THE TEXAS PIONEERS

By HON. A. J. ROSE

(Paper read before the Annual Re-union of the Old Settlers Association of Bell County, Texas, September 27th, 1902.)

Forty-five years ago the first day of this month (September) I, with my wife and two children, left our home in Missouri for Texas, our conveyance being a mule team. We reached Travis county on the 28th of October. Before leaving Missouri I was told that it was too dry in Texas to farm successfully. I stated to those who had informed me of the aridity of Texas, that it was my intention to find a tract of land which could be irrigated. In January, 1860, I purchased a desirable tract in San Saba county, about fifteen miles above the town of San Saba on the San Saba river. Here I found the place—a little river gushing out of the side of the mountain which afforded all the water I needed, and some to spare. My anticipations were more than realized, as I could raise on an average 75 bushels of corn and 250 bushels of potatoes to the acre. During the war between the states my place acquired the title of Egypt, due to the fact that people came from far and near for bread, and generally found it. Women whose husbands were in the army came for food, and none were ever turned away empty handed, money or no money. I do not say this boastfully. Under an order from the war department, men who had families were placed on frontier service, to protect the women and children from the ravages of the Indians, who were in the custom of visiting this section every moon for the purpose of stealing horses, and sometimes cattle, in addition to scalping white men and carrying away women and children. The time allotted me will permit me to relate but few of the incidents which have come under my personal knowledge during my frontier life, or during the eight years I lived in San Saba county.

Indian Depredations and Atrocities.

One afternoon a neighbor came galloping up to my house with the information that a band of Indians were rounding up horses on Dry Creek, a few miles north. In a few moments we were mounted and on our way, four or five others joining us. Upon reaching the creek, we noticed that the Indians had disappeared. We took their trail on a run, hoping soon to overtake them. The first thing that we discovered worthy of mention was a dead man who had just been killed and scalped by the Indians we were pursuing. This man proved to be Beady Hall, so called from his long beard. Here we gave up the chase, as we were several miles from shelter and it was almost sundown. We removed Hall to his home. At a late hour we reached our home. Then our companies were divided into scouts, and our scout was at once ordered out to watch the passes.

One afternoon we struck camp not far

"It was a running fight of over two miles."

from a lone water hole. Our Lieutenant went out to look for places to station sentinels; two men were sent north, while two were sent south for the purpose of killing a deer. The two who had gone north soon came running into camp with the report that they had seen Indians.

Within a short time we were in pursuit. When we were discovered by the Indians they immediately fled, one Indian leaving his pony. Firing was soon begun by our scouts, as all were anxious for a shot at the marauders. A shot from the weapon of W. Murray broke the foot Indian's neck. After taking a hasty glance at him we renewed the chase and continued it until near sundown. Several of our horses had given out. As we returned to camp we picked up two saddles that the Indians dropped to lighten the load of their ponies. We also found Beady Hall's hat, which was identified by his son.

At another time my nearest neighbor's son, Ed King, with Captain Williams and two others, were driving cattle. Williams and King were both killed and scalped by the Indians.

On Feb. 5, 1865, Mr. Todd of Mason, his wife, daughter and a negro girl were out on horseback. A bunch of Indians attacked them. Todd's horse became unruly, broke the bridle and ran away with him. When he finally regained control of his horse and returned to the scene of the attack, he found his wife mortally wounded, his daughter gone and the negro dead. The Indians were also gone. This news reached us the following day. Our scout went out, as did others, to watch the different passes, hoping to recapture the girl, but she was never found.

Ben Lynn, a neighbor, with some other neighbors, were out near my house

gathering up cattle. Lynn was shot by the Indians with an arrow, which killed him.

One evening after dark, in January, 1865, one of the scouts came to my home to tell me that the trail of a large bunch of horses had been discovered that evening going up Richland creek. It was decided that we would meet at Richland Springs the following morning to follow them. It was fully believed that the trail was made by Indians on the warpath. Arriving at the springs we learned that the Indians had spent the night several miles below on the creek. Our course lay north for about two miles, where we struck the trail, thence west. The trail appeared so fresh that we thought we would soon overtake them, but darkness came and no Indians were yet in sight. We camped on the trail with no water. It was very cold, as it was the first night after a seventy-two-hour old-time northern. Day-break found us going in the direction indicated by the trail. About 9 o'clock in the morning we saw smoke, horses and Indians. We made a run toward the smoke. Five Indians had their ponies tied near the fire; four mounted their ponies, while the foot Indian led on the start but soon fell behind. Many shots were fired, but the foot Indian was the only one we killed. We captured 73 head of horses and delivered them to the owner in Lampasas county. The next scout found eight more horses that we failed to find. Two of our men were slightly wounded.

The Miller-Morrow Fight.

In January, 1868, Will Miller and A. W. Morrow, from McCulloch county, purchased corn from me, a portion of which I ground into meal for them. On the morning of the 17th, a very cloudy and damp morning, they started very early

for their homes. Soon after their departure, James Sutton and I started out on the same road. After crossing the San Saba river we bore to the right. We were in search of hogs. About two miles out we heard the report of a gun or pistol. I called Sutton's attention to it, being impressed that there was something wrong. We soon heard another report of a gun, and Sutton remarked that in all likelihood some one wanted to reload, as the morning was very damp. I became uneasy. At this time one of our dogs startled a deer, and we ran up to the top of a high peak, thinking that the hogs would take fright at the noise of the dogs and that we might discover those we were looking for. While scanning the surrounding country from the peak, we heard voices and soon discovered two men on horseback. It still being quite dark, we were not certain who the men were, but we proceeded toward them. They proved to be two of my neighbors, Sloan and Armontrout, whom my wife had sent in haste in search of us, news having reached her soon after we left home that there were sixteen Indians about two miles above us near the river and that a scout was being hurriedly raised and would meet at Dorans, about three miles above my home. We hurried to Dorans to find that the scout had passed up the river, and we pushed on after them. On reaching the valley between the San Saba River and Brady's Creek, Sutton dismounted, saying as he did so, "Here is where they had it." He picked up an arrow, and we found another sticking in a mesquite bush. Further on we discovered a wagon track, while still further on a pair of stretchers and lead harness. Following the wagon track some distance we found the wagon in a deep ravine, with a great deal of blood and some arrows in the wagon. This explained the reports of the firearms that Sutton and I heard early in the morning. After trailing around to find the direction in which the wheel horses had gone, we soon came to the conclusion that the scout had found the wounded or dead men, and were returning home with them, so we hastened back as far as Dorans. No one had been there since we had left. I ran down home to let our families hear from us and to get a horse and gun, as I was riding a mule and only had a six-shooter. Armontrout went with me and remained at home. Sutton, Sloan and I hurried back to the wagon and began to search for Morrow and Miller, as we were confident that they were in some thicket not far off, and needed assistance. Darkness came on and we had failed in our efforts to find them. We then decided to return home, which was about seven miles, and to renew our search for the missing men the next morning, which we did.

The scout in the meanwhile had passed

ed the abandoned wagon, but pushed on after the Indians. But they eventually returned to Brady's at a late hour in the night, having failed to get any trace of the fleeing Indians. The following morning a man, desperately wounded, was discovered walking on the ridge between the river and the valley, referred to. It proved to be Morrow, with his boot full of water, looking for Miller. The two men, after their running fight with the Indians, had secreted themselves in a cedar brake. Both were badly wounded, and Morrow had gone down to the river in search of water. Miller received twenty-three arrow wounds and Morrow twenty. I hastened for help to take home the wounded men. Miller had to be carried in a blanket. My wife prepared something for the suffering men to eat, as well as some bedding, while I was harnessing my team. We sent men on to inform their families. We reached the home of Miller's brother-in-law at dark. After putting the wounded away, and eating supper, Sutton and I started for our homes, reaching there at a very late hour in the night, relieving the anxieties of our wives and children.

Morrow died about two years ago.

Miller was alive a short time ago. Perhaps no more desperate and successful fight with the Indians ever occurred than that put up by Miller and Morrow. They had but a pistol each and Miller lost his pistol early in the battle. Morrow is quite certain that he killed five of the Indians. It was a running fight of over two miles.

Frontier Hospitality Genuine.

These reminiscences have been hurriedly penned, but impressions thus made are not easily forgotten. In those days the latch string was at all times on the outside. You would meet with more genuine hospitality among strangers than in a day's travel than you would now in a week. The people would meet you with a hearty welcome and were always ready to share with you anything you might need, if they had it. You have heard of times that have tried men's souls. Such times were often found in frontier life; but with all the hardships, there was much enjoyment. Those of you who were in the regular army know how glad you are to meet with a comrade who stood shoulder to shoulder with you and never shirked a duty in time of need. Our minds run back to those days, and you can imagine the great pleasure of grasping the hands of those who were always ready for any emergency.

I will close by saying that the pleasures, hardships and hazardous life of the pioneer can not be fully understood or appreciated by those who have not been there. I came to this county the last of February, 1868.

Mineral Resources of Texas

BUILDING MATERIALS

By E. H. SELLARDS

Geologist Bureau of Economic Geology of the University of Texas.

The building materials of Texas include stone of all kinds and in addition manufactured products, such as brick and tile, as well as cement, plaster, lime, sand-lime brick, concrete, and concrete materials. The timber resources, which likewise are to be included as an important part of the building materials of the state, will be published later in our Magazine Section. The statistics given in this write up on the production of minerals are taken from the reports of the United States Geological Survey.

Stone.

The principal stone resources of Texas include granite, marble, limestone, trap rock and sandstone. The value of stone of all kinds produced in Texas during 1920, of which record has been obtained, was \$630,584.

Granite.

The granites of the central mineral region of Texas, including Llano, Burnet, Gillespie and Mason counties, are notable for the variety which they present, and it is said that this region contains granite for all purposes, for which granites are used. Of the several kinds of granite of the central mineral region the coarse-grained red granites are perhaps most widely known, having been extensively used in jetty work on the gulf coast. It is this granite that was used in the construction of the Galveston seawall. It is interesting to note that the Texas capitol, the largest state capitol in the United States, is built of this granite. Also, several Texas counties have used this granite in the building of their courthouses, and no building stone retains its lustre and original color better than Texas quarried granite.

The red granite of Bear Mountain in Gillespie county is fine grained and takes a good polish, and is used chiefly for monuments. The gray granites of the central mineral region are extensively used for monuments, for which purpose they are well adapted. An exceptional granite of this region is that known as "opal granite." This rock, which is a quartz felspar porphyry rather than a granite, has been used to some extent in monuments and as an ornamental stone. Its name of "opal granite" is justified by pale blue quartz or

chalcedony inclusions embedded in a dark red brown or flesh-colored matrix. The rock is hard and dense and takes a beautiful polish.

In addition to the granites of the central mineral region there are undeveloped granites in West Texas, particularly in Brewster and adjoining counties.

Marble.

Marble in Texas is found in the Central mineral region and has been quarried near San Saba. The marble at San Saba represents the altered limestone of the Ellenburger formations. Other marbles are found in Culberson, Presidio, El Paso and Brewster counties. The marble resources of Texas have been but little developed.

Limestone.

The amount of limestone produced and used for various purposes, chiefly as building stone, is difficult to estimate. Limestone bearing formations are widely distributed in Texas, and this rock is used locally in many places. Under these conditions little or no attention is given to the amount used.

The limestones of the Cretaceous formations, which cover extensive areas in the Edwards Plateau section of the state, make excellent building stone. These limestones, which for the most part, are light colored when quarried, oxidize upon exposure, to a rich, slightly cream-colored tint, very pleasing to the eye. A number of school houses and other public buildings in the counties of the Edwards Plateau, are built of this rock, which has proven very satisfactory. The library building of the University of Texas is built of white limestone from the lower cretaceous of Williamson county.

The limestones of the Pennsylvania formations found in North Central Texas are for the most part hard and as a rule dark colored rocks, which are used to some extent in building. The Ellenburger limestone, of Cambro-Ordovician age, which are found in and adjacent to the central mineral region of Texas, are hard, light-colored limestones, in places altered to marble. The limestone, marble and granite resources of the state are capable of much more extensive developments than they have as yet received.

Trap Rock.

Travelers on the Southern Pacific Railway, west from San Antonio, will note in Uvalde county, several prominent, rounded knobs or hills, which stand out conspicuously on the plains. These rounded hills represent intrusions of lava into sedimentary rocks. The lava upon cooling formed hard rocks, which persist as hills after the surrounding sediments have been removed by erosion. At Knippa on the Frio river, one of these trap rock hills is being mined, and is extensively used for road-making material, for which purpose it is exceptionally well adapted by reason of its hardness and its wearing qualities.

Sandstone.

Sandstone has been more or less used from various formations in the state. Near Barstow in Ward county, a red sandstone is quarried, which has been extensively used for building purposes, particularly as trimming for stone and brick buildings.

An examination of the distribution and character of formations in Texas, such as may be seen on a geologic map, will reveal the fact that by far the greater area of the state is well supplied with stone for building purposes.

Clay.

The clays of Texas are more extensive in their distribution than are the building stones. This is a fortunate circumstance since clays in many instances are found in parts of the state in which building stone is wanting. With regard to the geologic distribution, clays suitable for brick making are found in formations of Pennsylvanian, Cretaceous, Tertiary and Pleistocene age. Although widespread in the state, the clays being utilized are grouped with some exceptions in the more thickly settled parts of the state.

The clays of the Pennsylvanian formations are found chiefly in North Central Texas and have proven to be desirable for making paving brick, tile, sewer pipe, stoneware and glazing. Clays of this character are worked chiefly in Erath, Eastland, Palo Pinto and Parker counties. Some of these clays found in association with the coal have pro-

duced a very desirable grade of fire brick.

The Cretaceous clays have the advantage of favorable location in the thickly settled areas of the state, particularly in the black land belt of Central Texas. For this reason they have been more extensively used than have the clays of the Pennsylvanian formations of North Central Texas.

In association with the lignite bed of the Wilcox formation are found clays of a grade suitable for building brick, and such clays are extensively used in Bexar, Bastrop, Falls, Henderson, Limestone, Bowie and other counties. Farther to the southeast, desirable clays are found in association with the lignite beds in the Fayette and Yegua formations. In this area, however, neither the lignites nor the clays have as yet been extensively used. Clays in the Pleistocene formations for the most part represent reworked materials accumulated by the streams. Nevertheless they are suitable in places for brick making and are of importance as clay materials. The value of clay products in Texas during 1918 was \$3,026,559.

Lime.

Lime or "quick lime" is chemically an oxide of calcium or of calcium and magnesium. It is made ordinarily by burning limestone, although shells and other calcium carbonates may be used for the same purpose. In the process of burning, the carbon dioxide of the limestone is driven off leaving the oxide as lime.

In view of the abundance of limestone formations in Texas it is apparent that lime for building purposes will always be abundantly supplied. At the present time, the limestones most used for this purpose are those of lower Cretaceous formations, locations for lime building plants being selected near transportation and within reach of the thickly settled areas of the state. The lime manufactured in Texas during 1920 was valued at \$659,135.

Cement.

Cement is another manufactured product made from a combination of limestone and clay, of great importance in building operations. As in the case of lime the locations for cement manufacture have been selected with regard

to transportation and accessibility to markets. The cement plants now operating in the state are located in Bexar, Dallas and El Paso counties. The Bexar county plant uses the Austin chalk, together with a thin over-lying bed of clay probably of the Taylor formation. The Dallas county plants also utilize the Austin chalk. The shale used in these plants, however, is from the underlying Eagleford formation. The El Paso cement plant uses lower Cretaceous limestone. The cement manufactured in Texas during 1920 was valued at \$2,562,208.

Gypsum.

The gypsum deposits of Texas, from which plaster of Paris is made, are extensive. It happens, however, that the gypsum beds are found chiefly in West Texas, where there is less demand for building materials than in the more thickly settled parts of the state. For this reason the gypsum resources have not been fully utilized. At present gypsum is manufactured at one locality in Henderson county. The gypsum beds are found chiefly in the Permian formations of West Texas. The gypsum-bearing formations of the Permian are found on the surface in a belt of country extending in a northeast-southwest direction from the Red river in Hardeman county to Sterling county. The gypsum produced in Texas during 1920 amounted to \$1,439,491.

Sand and Gravel.

Sand and gravel are commonplace and as such are passed with inadequate appreciation of their value or usefulness. As a matter of fact, sand finds a varied use in the form of building sand, glass sand, engine sand, molding sand, abrasives, as an ingredient of sand lime brick and for other purposes. The amount of sand used in building operations is quite impossible to estimate. Usually the sand for this purpose is obtained locally and no record kept of the amount used.

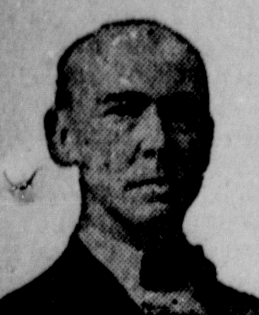

Sand is the chief ingredient in the manufacture of glass. For this purpose it is necessary to have a very pure sand, free from any considerable amount of iron or clay, either of which affect the color and clarity of the product. Glass sand has been mined near Santa Anna

(Continued on Page 5.)

CURRENT COMMENT

By J. H. LOWRY

STOPPER
JUGGED HIM.

When a man reforms he must make a thorough job of it or the reformation will soon come to naught, and his last state may be worse than the first. The utensils and paraphernalia of sin will work destruction

carried into the camp of righteousness. Saul, the son of Kish, you will remember, made the fatal mistake of saving some of the best sheep and oxen and driving them to his own laughter pen when he destroyed the Amalekites. Paul put up a very fine excuse for his disobedience, an excuse which any Texas politician could take to the stump and make a killing with before the voters. He saved the fattest sheep and oxen, he said, to offer a great sacrifice to the Lord. The Lord, however, wasn't fooled. He read the thoughts of Mr. Saul's heart as easily as if they had been before him in big print. It wasn't a sacrifice unto the Lord that Saul saw in those fat steers and sheep. The crafty king of Israel saw porterhouse steaks, pot roasts, prime ribs of beef and juicy mutton chops. And so Paul lost his kingdom and his life by carrying the substance of Amalek into the camp of the Lord's chosen people.

When a man breaks off with the poker table he must burn the whole deck, if he would make a successful hide from temptation. If he keeps a few of the prettiest face cards for thumb papers and book marks, he will soon find himself gazing upon the highly colored cards, and in evil moments, imagining if he could get in one more game he could draw a royal flush, or a straight flush, and fill his pockets with long green at a single sitting. When a man plays with whiskey it won't do to save a little of the rectified spirits for attacks of the flu or to make camphor. The little that's in the bottle will keep the mouth watering and the habit in full flower. The last drop must be consigned to the gutter and the jug must be smashed if reform is to sit steadily on its throne.

But why waste the jug, you are ready to ask? You cannot eat or drink the jug, and it cannot, in its state of emptiness, work a magic spell that will produce intoxication or emit vapors and fumes that will inebriate. Why not keep the jug as a trophy of your victory over strong drink, and dedicate it to nobler purposes? Why not make it a receptacle for sorghum, the greatest saccharine triumph the world has ever known? Can you imagine a more satisfactory victory of right over wickedness than to

see a fond father, who was once a slave to strong drink, and who once poured the destroying oil of Bacchus from the jug into his innards, stupefying his body, blurring his eye and quenching his nobler aspirations—I say, can you imagine a sweeter triumph of right over wrong than to see the father of the family pouring from the very container from which he once quaffed the liquid fire, pure, sweet, grainy sorghum, to gladden the hearts and bless the bodies of his progeny? And perhaps the jug may be turned into a receptacle for vinegar, the wonderful acetic acid which serves so many great and noble purposes in pantry, dining room and kitchen. Right now is turnip green season, and vinegar is turnip salad's handmaiden, as necessary to the correct development of the flavors of the glorious rutabaga foliage as salt is to the palatability of an egg. Personally I have conscientious scruples against the destruction of a jug, for the jug was my friend and companion in the halcyon days of youth, when eternal springtime was in my heart and there was hair on my head. Well do I remember the days when the little brown jug accompanied me to the cotton fields and the corn fields in good old Tennessee. The jug was filled with the most wonderful beverage known to man—the delightful acidulated lacteal fluid, better known as buttermilk. The jug stayed in the clear, cool little spring, shaded and protected from the sun's scorching rays by sassafras boughs, while I wielded the hoe or guided the meanderings of old Fill up and down the rows. Wonderful, glorious! the beverage that I drank from the little jug, and what a cooling, soothing influence it had upon my sun-baked, steaming internal economy—"no well-filled goblet could tempt me to leave it, though filled with the nectar that Jupiter sips." But, in spite of my personal love for the friend of my youth—in spite of the many splendid uses to which the little brown jug can be put—I say again, and warn all who break with John Barleycorn, to also break the jug. It is as dangerous to have around the camp of righteousness as a Upas tree or a siren. Had Dave Simpkins, a fellow I knew in Tennessee, smashed his jug when he turned from his destroying habit and evil ways, all would have been well with him; but he didn't, and there's another, and a sadder, story to tell.

Dave Simpkins was a pretty good sort of a fellow. He always helped his neighbors kill hogs and thrash wheat, and was never known to hold out chewing tobacco on a friend when he had as much as three chews in his pocket. He voted the Democratic ticket without a scratch, abused Republicans and stayed away from Socialist meetings. He attended the annual revival meetings, which were always held at old Cypress church dur-

ing the moonlight nights of August, and none of the brethren was as gifted, as fervent, or as loud in prayer as he. When interest lagged in the service, when saints grew cold and sinners indifferent, one prayer by Dave was worth a dozen sermons in melting the hearts of sinners and inciting the saints to activity in the work of the kingdom. But Dave would drink. The little brown jug was always in his closet, and when Dave had put three or four drinks of red-eye under his shirt, all the good that was in him took wings and sailed away, and he was a demon on earth. He usually used better judgment in timing his drinking sprees, but one fateful summer Dave got on a big "high lonesome" while the annual revival meeting was in full blast. The devil working in him, he went to the meeting house while his drunk was in full flower and did many awful things. He called the preacher bad names, he threw gems of profanity at the pious elders and deacons, he shot all the window lights out of the meeting house, and one stray ball from his pistol made an ugly wound in Uncle Billie Thomason's leg. Of course, Dave was turned out of the church; of course he was arrested, and several ugly charges were entered against him on the court records of his county. Forgiving, sympathetic neighbors made bond for Dave, and it was arranged that he should forfeit his bond, move to Texas and begin life anew. Dave took a solemn vow never to touch whiskey again, which vow was made in all penitence and earnestness. Between suns Dave and his family left Tennessee for Texas, his destination known only to a few close friends, who promised to keep quiet, and who kept their promise. Reaching his new home, Dave's conduct was that of a model citizen. He united with the church, he led the singing in the Sunday school, he was made road overseer and school trustee, and no man in the community stood higher or wielded a greater influence for good. The seasons were propitious, cotton yielded well and was at a good price, and the third year out Dave bought a Ford. But unfortunately, in his trek to Texas Dave took the little brown jug. Never did he expect to put a drop of whiskey in it, and he never did. But jugs are needed in all well regulated and well equipped families, for purposes that are perfectly legitimate, and so Dave's little brown jug was included in the shipment of household plunder; and thereby hangs a tale, and a sorrowful tale it is. It so happened that before leaving Tennessee a stopper was needed for the jug, and, no corn cob being handy, Mrs. Simpkins rolled up a newspaper and made of same a stopper for the jug. The improvised stopper continued to do duty, and one day, after the family had been in Texas about four years, Mrs. Simpkins, being engaged in putting up cucumber pickles, sent one of the children, with the jug, to

a neighbor's to borrow some vinegar. On the way the child discarded the old paper stopper and replaced it with a nice, clean corn cob. It so happened that a neighbor, in passing along the road, picked up the old newspaper that had been used as a stopper for the jug and unrolled it. And lo, it was the old home paper, the one that told the story of Dave's crime, of how he had shot up the meeting house, and wounded Uncle Billie Thomason, and had been arrested and placed under bond.

Of course the news spread like wildfire. The next Sunday Dave was turned out of the church and another man led the singing at Sunday school. Chagrined because they had been worked by an impostor; because they had been nursing a viper in their bosoms, as it were, the neighbors notified the officers in Tennessee, and a few days later the sheriff appeared on the scene and escorted Dave Simpkins back to Tennessee, to face the charges against him and undergo punishment according to the magnitude of his crime. A few weeks later the family followed, but they had to sell the Ford to get money for traveling expenses. Dave Simpkins finally appeased the wrath of an offended law by spending a few months in jail and paying a small fine, but the experience broke his spirit and he has made no great effort to "come back." He never goes to preaching now, but sits around home on Sundays with his work shoes on, but no socks. And the family never has been, and I doubt whether they ever will be, able to buy another Ford.

And so I say, when you reform destroy all the paraphernalia of your sinful days. If you break with John Barleycorn, smash the jug and burn the stopper.

We're feasting on October now, and it's the greatest feast of all the year. Angels have polished the vaulted skies and great indeed is the amethystean glow. By day we have sunlit splendors and by night we have astral glories that delight our eyes and gladden our souls. Wonderful indeed are these pure October airs; wonderful indeed the pictures in forest and field when autumn touches her tints into the leaves and spreads her glories on the hillsides and in the valleys. But these cooler October days mean different things to different people. To the head of the household they mean heavy fuel bills, to be followed soon by frozen pipes and the awful nightmare of plumber's charges. To the society girl they mean a new fall hat, a longer skirt and a visit to the oyster parlor. But to the average man the falling temperature means that he will be able to keep on good terms with his wife and take only one bath a week.

The other day, when I had nothing

else to think about, I thought of what a wonderful world this mundane sphere would be, and how quickly all the world's problems would be solved, if every person would show the same courage and the same determination to win the battles of life that characterize the efforts of the American boy when he sets his head to ride a bull yearling.

People who are always finding fault with the works of their Creator seldom pause to think on how much worse things could have been. Think, for instance, how much we would have lost in scenery, and what an addition there would have been to confusion and dread, if woman had been created with two tongues and only one leg.

People say many harsh things about egotism; many abuse it as though it were the most ignoble of all the human attributes, without a redeeming virtue, and some pronounce the word with such frowns and sneers and gritting of the teeth that we are led to believe they would gladly expunge it from the dictionary. But egotism is not a bad thing; in truth, it is a good thing, and the man who lacks it is as poorly equipped for the work and battles of life as the person who lacks temper, pep or courage. Egotism is believing in one's self, and the man who doesn't believe in himself and his ability to achieve does very little for himself or the world at large. But egotism is a child that must be kept in the closet and not permitted to mix with company. It's an attribute that must not go on dress parade. In a way egotism and a night shirt are the same in their relation to man. Every man should have both, but man makes of himself a sorry spectacle and a horrid picture when he displays himself in either.

I read today that Ireland is to apply for admission into the League of Nations. I love the "Ould Sod," but I sincerely hope her application for membership will be rejected. I am anxious to see the League of Nations function gracefully and hasten the time when all the national airs will be blended into the glad refrain of "Peace on Earth, Good Will Among Men," but I know Ireland, if she gets into the League, will blow a discordant note. I grew up with some Irish kinsfolk, and have read Irish doings for many years, and I am sure I know what Ireland opposes and what Ireland favors in government. She opposes the government that is, no matter what it may be, and she favors the government that can't be had. As for peace, Ireland enjoys it and loves it, but Ireland's kind of peace comes after a big fight and lasts only a few minutes. In fact, peace without a skinned head and a black eye would be a shame to an Irishman.

We Women and Our One Kingdom

By KATHLEEN NORRIS

"Of course, the next generation will have its own amazing inventions and discoveries," said one of us—one of us parents in the early forties, I mean, when we were all discussing the age and the children the other day, "but it is hard to imagine what they are to be!"

And we began to review the achievements of our own generation, and to tell the unbelieving youngsters about the days when electric light—the same light that illumines whole cities and creeps so brilliantly today into the humblest homes—was the novelty called the incandescent light, and when motor cars were "horseless carriages" (does anyone else remember those tiny pen-and-ink sketches of them in the funny little magazine that used to be "Vogue"?), and when the telephone was still exciting, and before the movies and radio were in existence.

We don't feel very old, we children of the eighties, and yet all this has come in our day.

"Well," somebody suggested, in answer, "perhaps the next big thrill will be when we get in touch with a star!" We were talking in the starlight, and we all looked up at the velvet, impenetrable blackness of the planets and the Milky Way lying like a scarf very low and very close across the brighter constellations, and something of the awful, inspiring beauty of that possibility came over us all.

Our world—this little floating speck in space—sending out its greeting into the big unknown and receiving a reply—startling Europe, China and the smallest African or Brazilian village where there is a man.

The Baubles We Treasure.

What would we learn from that planet of some day we began to communicate with one? Might that be a world that had really believed in its Master, had never known torture and starvation and wars and pestilences and famine? Or might it be a world even less advanced than ourselves? For we do make occasional struggles toward the light.

And what would a visitor from that other planet think about us? Did it ever occur to you to imagine logically what he must think about us, in one particular? The visitor, studying

us with none of our deep-rooted, long-established stupidities and prejudices to blind him, would look with a perfectly indifferent eye upon the things we treasure.

He would see in jewels only bits of stone; in fashion only a most extraordinary custom of cramping our bodies; in magnificent furniture only annoying impedimenta, and in our much-manipulated food (in bits of animals and roots and the milk of cows all heated and chopped and divided upon bits of colored china) only a sort of universal insanity.

He might think grand opera strange—little creatures pretending to be some thing else, and screaming and parading in dark, crowded rooms, to the noise of small brass tubes and wooden boxes covered with horse-hair and cat-gut. And what he would think of such things as feathers, finger bowls, buttons, fountain pens, headache powders, servants' liveries, bracelets, embroidery, pillow shams and pate-de-foi-gras, makes one dizzy to imagine!

Imagine yourself trying to explain to him why machine-finished silver forks are so much cheaper than hand-finished ones, and why brides' announcements must be engraved and not printed!

Whatever else he thought, or didn't think, our distinguished guest would regard us as having exactly one priceless, one exquisite and extraordinary thing, and he might be surprised to find how lightly we regard it, and how wantonly we waste it.

We would realize, what we do not, that the reason we are all here, the reason that there is a world, is because there is Life. It is Life that is immortal, not French mahogany and African diamonds. The smallest child that dies hungry and wet and dirty in a London slum is more precious, in the great scheme of things to which we and the stars belong, than the Romanoff coronet or the treasure of the Vatican.

And our visitor would see this, coming from realms where Life, where Greater Livingness is the All. He would look at us in stupefaction, saying to himself:

"Their painted complexions—the tiny bits of painted canvas on their walls—the infinitesimal laces shut into infinitesimal

boxes—the petty admiration of their gabbling, stupid neighbors—these things are more to this poor, demented people than Life.

And he would hunt out some simple, wonderful woman in your town and mine, some woman with little sons and daughters gathered about her, and with a tiny baby in her arms, and her breast brimming with the glory and beauty of motherhood, and her he would envy, and worship, and enthroned.

Woman's One Kingdom.

For that is our one kingdom, as women, and that is the greatest kingdom in the world—and perhaps in any world. The living, mysterious presence of Life in our homes, rather than the dusty, stale accumulation of what is dead. Everything else may be bought and sold, may have value today, beauty today and may be trash tomorrow.

But childhood, the tender, marvelous little structure of delicate flesh and blood, the awakening eyes, the exploring feet, the little voices taking a stronger and stronger part in the family councils—that is the true richness, and the only miracle we ever will know.

Women do not believe that now, and civilization has been so unjust to them and to their children that it is not astonishing that they do not realize it.

The splendor of bearing, the triumph of knowing that from her living and loving has sprung this troop of bright-eyed, eager, responsive children, and that she has given to Life these ringing voices and joyous laughs, these rich heads of hair and dancing feet and busy sunburned hands, are comparable to no other richness in the world for a woman! But too often financial worry, physical breakdown, and the contempt of the barren, prosperous, well-corseted sister next door have been before her eyes to make her feel, in her hurt and puzzled heart, that the selfish, sterile way is, after all, the way of wisdom and peace.

The Childless Woman a "Slacker."

I think we are beginning to learn that this is not true. And some day all the world will know it, and the childless woman will be a "slacker" in the truest sense, and the greatest crown and glory

of life will be more life-caps. To give the world men and women is to give it no mere stamp collection or no mere theory of mathematics. Why, children are the world, and the woman with children is part owner of the universe!

This is no mere fallacy of a sentimentalist, who happens to love to hold a lumpy new baby in her arms, and who feels that there is no altar more wonderful than that altar in a darkened, pain-filled room where a child gives his first little cry and where a mother is born. This is the fundamental truth, and the greatest nation of the future will be the nation that realizes it first, the nation that guards its children as it does its public buildings, the nation of men and women who feel that a baby is more valuable than a Percheron or an Airedale.

Whether our white gloves this year have black markings on their backs or white, and whether we adopt the English custom of ending formal dinners with a "savory," or continue to stop with ice cream and chocolate cake, are, of course, questions of international importance.

But when these are settled, could we begin to discuss the absurdity of "Bottles for Babies?" Could we be the first nation in the world that felt that combating hunger and want and preventable illness for our tiny, precious, irreplaceable citizens was as nice as collecting fine paintings or fine china or learning to smoke? Could we work toward a government recognition of the women who bear magnificent little boys and girls, and could we—by the potent argument that they are worth money—begin ourselves to respect, admire and envy the mother of sons and daughters?

The Power of Motherhood.

You fortunate mothers of many children, begin the good work yourselves. Rejoice in them, boast about them, love them more tenderly, and let the first emotion that attends the knowledge that the present baby is about to be ousted from his sinecure be one of pride and joy.

Eliminate from your lives all the artifices and empty conversations that have been put there by idle and barren wom-

en, and make your home simply a safe, efficient, happy place for the children. They are your excuse for the fact that the plain deal table is washed after every meal, and that you have dispensed with table cloths; they are your reasons for not joining the Dante Society, and for dropping chopped nuts and stuffed eggs permanently from your bill of fare.

You don't know how powerful you are. You don't know how other women feel, in their hearts, when you say conclusively:

"Ah, but you haven't children! And we have four, you know."

You let some other childless women shame you, make you—who are four times a millionaire—feel inferior. But, believe me, she goes on to her Dante Society with a primordial jealousy and envy within her, with a pain as old as all history gnawing at her heart.

After all, if my mother had preferred Dante, and yours had, you and I would not be meeting today. And what about Dante's mother? I wonder if she rebelled, and talked it over with some neighbor, and suffered the neighbor's superiority, and regretted that now she probably couldn't buy that pretty silk pattern, because she had given birth to the world's greatest poet. That would look too ridiculous!

TEXAS' TRUCK GROWING CENTER.

Texas is becoming noted for truck growing, putting early products on the market each spring, so that in the cities of the north and east Texas tomatoes, Texas lettuce, Texas Bermuda onions, Texas grapefruit, oranges, and other Texas fruits and vegetables are becoming as well known as products from California. In the lower Rio Grande valley the winter planting has been begun. A large acreage is being prepared for spinach, which was profitable last year. But the cabbage crop did not turn out so good, it is said, so fewer acres will be planted to cabbages this year. Onions are variable, making a good profit one year and running into a loss another year, so, the onion acreage is yet in doubt. But there will be large plantings of egg plant, carrots, beets and peppers.

NEGRO HIT ON HEAD BY TRAIN.

Cary Johnson, a young negro, fell asleep on the Santa Fe track, near Temple, and was struck on the head by a train and knocked from the track, but only suffered a slight abrasion of the scalp and a fractured shoulder.

HAS CHEWED TOBACCO 63 YEARS.

Ed R. Schands, county bailiff of Travis county, has been chewing tobacco for sixty-three years. Ed modestly estimates that he has chewed 15,530 small plugs of tobacco during his 22,995 "chewing days."

ART COLLECTION AT STATE FAIR.

The State Fair at Dallas, October 6 to 15, will have a notable art collection valued at \$5,000,000. The pictures have been secured by Julian Onderdonk, famous San Antonio artist, and will be brought to Texas with the option of purchase of any picture among the collection, and the return of those not purchased after the fair is over.

HOUSTON PORT TRAFFIC SHOWS GAIN.

Traffic through the channel port of Houston for the first eight months of this year was 73 per cent greater in tonnage than that of the corresponding period last year.

The number of vessels calling at the port increased 58 per cent in the same period.

NEW PAPER MILL FOR DALLAS.

The Trinity Paper Mills Corporation, a \$6,000,000 organization backed principally by New York capital, is perfecting plans to erect a \$500,000 paper mill in Dallas and will manufacture high-grade paper from cotton linters. A similar mill is now in operation at Commerce, Texas.

14,383 PENSIONERS ON PAYROLL.

The report of the Pension Department of Texas for the quarter ending August 31, shows a total of 14,383 pensioners on the rolls, of which 373 are in the Confederate Home. The total amount paid pensioners is \$354,912. During the quarter 230 pensioners died and 202 new applications were approved.

ANCIENT ROAD EXCAVATED.

Workmen excavating for the Bayou bridge in San Augustine discovered an old rock roadway, evenly laid, ten feet below the surface. The road undoubtedly was once the old San Antonio Trail and is presumed to have been laid back in 1846 or thereabouts.

No one now living remembers anything of the history of this road construction.

DEVOTEE OF REVIVALS.

"When I was young dey was lots of shoutin' and singin' and praisin' de Lord, but folks don't shout happy no mo'," said old Auntie Ann Clark, nearly 100 years old, who came from Georgia to Texas many years ago and is now living in El Paso. She likes to attend revival meetings, but complains that they are not so exhilarating as they were when she was young.

"CORN WHISKY" IN DISGUISE.

Two men were recently treated at the Emergency Hospital of Dallas who had been victims of wood alcohol. The two men drank the poison believing it to be corn whisky. It took heroic treatment, administered by two physicians, to save the men's lives. From Sept. 1 to Sept. 9, this year, six deaths from wood alcohol poisoning were reported from Brooklyn, N. Y.

TWO TEXAS GIRLS TOUR EUROPE.

Miss Jessie Mary Hill of Alvarado and Miss Katherine Pollard, two students at the University of Texas, who have been specializing in journalism, have been spending the summer touring through various countries in Europe. They have returned to the University, but it is said Miss Pollard may return to France to take up journalistic work there.

CAST FIRST VOTE AT AGE OF 90 YEARS.

Mrs. Jane Killingsworth Moughon, who lives in Gregg county, and is 90 years old, cast her first vote in the recent primary election. She has been a resident of Gregg county for 78 years and is among the last of the original East Texas families, whose old ante-bellum homes are scattered throughout Jefferson and other East Texas counties.

MEXICO'S FAMOUS MILITARY BAND SERENADES AMERICAN.

Mexicans know how to appreciate helpful and courteous acts. It was not long since the city of Matamoros, on the Mexican side of the Rio Grande river, a few miles from Brownsville, was threatened with inundation by Rio Grande flood waters. The Mexican citizens had been fighting the rising waters for several days, but were being overwhelmed. Sam Robertson, a civil engineer, whose home is at San Benito, heard of the trouble at Matamoros and, going there, directed the flood prevention work with such success that the overflow was turned back. To show their appreciation, the famous military band of Mexico came from Mexico City and serenaded Colonel Robertson at his home in San Benito.

109-YEAR-OLD VOTER.

When the polls opened at Lampasas in the recent run-off election, one of the first men to cast his vote was J. A. Russell, who is now 109 years old. Mr. Russell doesn't mind his age in the least and always "mixes with the crowd," when there is anything of interest going on. He can discuss economic and political issues and manages to keep pretty well posted on current events of the day. He makes his home in East Lampasas.

TO URGE BOUNTY FOR RATTLESNAKES.

Representative John T. Smith of Travis county has announced through the medium of the press that he will introduce at the regular session of the Legislature next January a bill providing for a bounty to be paid for the killing of rattlesnakes. Rattlesnakes have been more plentiful in Texas this year than in any previous year, and it is reported that within the last two months four persons have died from the bite of rattlers in Travis county.

DANCED VIRGINIA REEL.

One of the most unique and interesting features that was presented at the Navarro County Fair, held in Richland on the last day of September, was the dancing of the Virginia reel, by a cast of thirty-six couples, composed of Richland people. The costumes worn were similar to those of the old Confederate days and this cast of characters danced the old Virginia reel as in olden times. A number of old-time fiddlers furnished the music that accompanied the dance.

CELEBRATES 86TH BIRTHDAY.

Col. Clabe W. Merchant of Abilene, one of the best known cattlemen in West Texas recently celebrated his 86th birthday. He was the first white child born under the flag of the Republic of Texas, having been born at Nacogdoches Aug. 31, 1836. Mr. Merchant is still strong and vigorous for a man of his age and makes long automobile trips to his ranches in New Mexico and Arizona. He was a Confederate soldier during the war between the states.

RUSSIAN TRAINS FOR FOOTBALL.

Among the candidates for the football team at Southern Methodist University is Dimitri Shvetzoff, 19 years of age, and weighing 165 pounds. He is a son of a general in the army of the late czar, and had many stirring adventures, even though a mere boy, before he was able to escape from the Bolsheviks, after they had taken possession of Russia. He had never seen a game of football, it is said, until he appeared on the S. M. U. football field to train as a pigskin chaser.

TEXAS 1921 LUMBER CUT.

The 1921 lumber cut, as reported by thirty-two mills in Texas, announced by the Department of Commerce, amounted to 657,216,000 feet board measurement, which was an increase of 133,000,000 feet, compared with 1919. Seven hundred and ten mills throughout the lumber districts reported a 1921 cut of 13,333,333,333 feet, a decrease of more than 500,000,000 feet compared with 1919.

The Arkansas cut was 613,434,000 feet and that of Louisiana, 2,250,000,000 feet.

BUILDING GOOD ROADS IN TEXAS.

Slowly, but steadily and surely, mile after mile of improved highways are being constructed in Texas. The Texas State Highway Department announces that 128 miles of better roads were contracted for during the month of August at a cost of \$1,372,386. This brings the total for the first eight months of this year to 550 miles, the total cost being \$6,784,000. About fifty per cent of this expenditure comes from local sources and the other fifty per cent is supplied by state and federal aid.

OYSTER SEASON IS APPROACHING.

Although the oyster season is here by virtue of the rule that oysters may be eaten during any month having an "r" in its name, yet the weather is said to be just a little too warm for them as yet. The rule of "r" was not intended to apply to mild climates like our Texas climate, and oyster fishing does not really begin here until the latter part of September or early in October. Along the Texas coast oysters may be bought from the fishermen at 35 to 50 cents a hundred, but in the restaurants, away from the coast, they cost that much a dozen.

EARLY WINTER FORECAST.

An early and severe winter is usually indicated by Nature's signs. Forecasts last year got many persons worried about the extreme severity of the winter ahead, yet it proved one of the mildest in recent years. The signs may mean something this year, however. For one thing, the ducks are flying south earlier than usual. Once before when they went south in early September, the winter was unusually cold. Already many ducks have arrived at the Texas coast and the bays are reported teeming with teal, including a few red heads or mallards. This is the only forecast of a severe winter that has been reported, but other "signs" may be expected almost any time.

WEIGHTED DOWN WITH MEDALS.

Sam Dreben, one of the delegates to the American Legion, assembled in Waco in state convention, early in September, wore many medals that had been conferred upon him. Dreben is an El Pasoan and was a top sergeant during the world war. He was awarded five decorations—the French Croix de Guerre, the French Medal Militaire, two French medals for distinguished service and a distinguished service cross. The French medal militaire is regarded equal to the American congressional medal.

APPEALS TO FARMERS.

An appeal to the farmers, merchants and bankers not to force all the cotton upon a declining market, causing lower prices and the loss of millions of dollars so badly needed to pay the farmers' debts and revive the business of this country, has been made by George B. Terrell, Commissioner of Agriculture, in reviewing the 1922 cotton situation. He says the estimate of the Texas crop as 3,644,000 bales is a million bales too high and that the reports furnished his office from reliable men in all parts of the state indicate a crop of 2,462,400, as compared with a crop of 2,179,145 last year. The average cost of producing this year's crop is estimated by Mr. Terrell to be 22c a pound.

TENNESSEE HONORS DAVID CROCKETT.

Lawrenceburg, Tenn., unveiled a monument Sept. 14th, commemorative of David Crockett, who lost his life in defense of the Alamo at San Antonio, Texas, April, 1836. Lawrenceburg was the scene of Colonel Crockett's early political activities, where he was defeated for re-election to Congress from the Twelfth Tennessee district. Following his defeat, Colonel Crockett removed from Tennessee to Texas, where he arrived in time to aid in the defense of the Alamo. The monument cost \$3,000, and this amount was contributed partly by the state of Tennessee and partly by private subscription.

STANDARDS FOR GRADING PRODUCTS.

The state commissioner of markets and the state marketing agent held a hearing in El Paso on September 23 to re-establish standards of grading alfalfa hay in Texas. It was attended by producers, representative of commercial houses, co-operative and other dealers. A similar meeting is to be held in East Texas in November to establish grades on rice. Standards on sorghum grains were established in Texas last spring, as a result of which it is claimed that between one-half million and one million gallons of sugar cane syrup will this year be marketed co-operatively.

FOOTBALL GAMES AT STATE FAIR.

Although several dates remain to be filled, there are already a number of football games booked for the week of the Dallas State Fair, October 6 to 15. Games already scheduled include:

Oct. 10—A. and M. of Texas vs. Tulsa University, Tulsa, Okla.

Oct. 11—Oak Cliff High vs. Waco High.

Oct. 12—Grubbs Vocational School vs. East Texas Normal.

Oct. 13—Waco High vs. Tulsa High, Tulsa, Okla.

Oct. 14—S. M. U. of Dallas vs. Louisiana State University.

BALL FANS LIKE THE RADIO.

The radio, which has been slowly gaining in favor, leaped into the front rank of public regard during the games between Fort Worth, winner of the Texas League pennant, and Mobile, winner of the Southern League pennant, for the all-South championship. Ball fans, not only in Texas and Alabama, but in many other states, got the game by radio, play by play, from the field. There was no score board to watch, but the plays were shouted into their ears, seemingly right from the field. Many baseball fans who had previously given no attention to the radio, have now become enthusiastic radio fans.

WATER STORAGE IN TEXAS.

There are more reasons than one why flood waters should be kept from running to waste and stored for use. The usual plea is that this water is needed for irrigation during the summer months, so the crops may be carried over the periods of drouth and made to produce a bountiful harvest. While this is true, yet there is more to be said in favor of water storage. Dr. J. H. Florence, state health officer, thinks an extensive reclamation program would prevent much malaria, which results each year from swamps and lowlands. The recent water shortage in many cities and towns shows how much is needed an adequate supply of water storage against dry seasons. It is not right that a city should have to fight a flood one month and suffer a drouth a month or two later. And there is this advantage, too, in favor of catching the flood waters in reservoirs—these ponds and lakes may be made pleasure resorts, surrounded by parks, while the country about them, instead of producing swamps, mosquitoes and snakes, will produce fruits and vegetables and add to the wealth of the state.

PANHANDLE PLAINS CHAMBER OF COMMERCE.

Panhandle Plains Chamber of Commerce met at Amarillo, Sept. 18th for a two-day convention.

B. E. Finley, retiring president, made a report showing how the organization had saved hundreds of thousands of dollars in freight rates to Panhandle farmers, had secured railway cars during a shortage of railway equipment and also had been helpful in providing labor for the harvest fields.

Sam Braswell, editor of the Clarendon News, was elected president to succeed B. S. Finley.

15,000 TRACTORS IN TEXAS.

Travelers through the state of Texas are impressed with the number of tractors being used by Texas farmers, there having been an immense increase in the use of this one machine since the beginning of the war.

Figures show that there are 15,000 tractors in use in Texas at the present time. Motor trucks which haul from five to seven tons are also in use on many Texas farms. Tractors and farm trucks are even used to harvest grain by attaching them to wheat binders, or to haul a train of wagons full of wheat or corn. Sometimes they are used to pull a train of gang plows.

TEXAS OIL POOLS MULTIPLY.

Texas is one of the most interesting states of the Union because of its vast acreage, its great variety of soil and climate and diversity of production and resources. Its 265,700 square miles of area constitutes 8.7 per cent of the total area of the United States, and its diversity of elevation, rainfall, temperature and soil has made it adaptable to a great variety of crops.

It is one of the largest oil-producing territories in the world, geologists having said that a large oil pool underlies a great part of the state, only part of which has been proven. With present production one-fourth of all the oil in the country is produced in Texas.

LAWMAKERS MUST REPORT.

Reports concerning their residences, occupations and addresses are being sought from the ninety Democratic nominees for the Texas Legislature who are seeking legislative honors for the first time. Either because they have no Republican opposition or because they do not fear it, most of these nominees consider themselves elected. O. P. Basford, reading clerk of the Texas House of Representatives, has written to them for their biographies so that he may complete the House roll of membership immediately after the general election in November. The House has nearly 150 members, so that a few more than one-third will be returned, while others will be serving their first term.

TEXANS BECOME MISSIONARIES.

Ten young Texans sailed recently from Seattle for the Orient as missionaries, among them being Mr. and Mrs. Paul C. Porter and young daughter of Waco, who will do educational work at San Paulo, Brazil; Miss Josephine Ward, Austin, who will do educational work in Kaifeng, China; Miss Louise Willis, Waco, who will also go to Kaifeng, China; Miss Lois Howard of Brownwood, who goes to North China; Miss Jennie L. Swearingen, Bellville, who will do educational work in Bellohorizonte, Brazil; Rev. J. R. Mashburn, DeKalb, who will do evangelistic work in China; Dr. and Mrs. W. P. Meredith and young daughter of Pecos, who will do medical work at Ogbomoso, Nigeria, Africa; and Miss Nell Hall of Hightower, who will teach home economics in Kaifeng, China.

These missionaries and many others are being sent out to new fields this year by the Foreign Mission Board of the Southern Baptist Convention, which has already spent more than \$6,250,000 in foreign missionary work.

ACCREDITED HIGH SCHOOLS.

From the office of the State Superintendent of Education comes the announcement that forty-two Texas high schools were made accredited schools this year. They are listed in three classes as follows:

First Class: Bellevue, Byers, Cherokee, College Station, Desdemona, Dickinson, Junction, Mathis, Megargel, Rio Hondo, Roaring Springs, Spearman and Winters.

Second Class: Follett, Gulf, Gunter, La Feria, Lyford, Maple Lawn, Mingus, Moran, Morgan, Nederland, Olden, Quitman, Saint Jo, San Gabriel, Shiro, Willis and Wilmer.

Third Class: Academy, Alamo Heights, Anahuac, Cason, Eden, Enhouse, Goodlett, Lamkin, London, Parks, Spring and Webster.

Sixteen other schools gaining higher classification than they had previously held, were, Aspermont, Bowie, Goree, Harrold, Higgins, Joaquin, Meridian, Palmer, Raymondville, Schulenberg, Shamrock, Spur, Van Horn, White Deer and Woodville.

A still larger number of schools would have been accredited had it not been for financial difficulties which caused a general lowering of standards in many instances. The number of accredited high schools in Texas now is 519.

TURKEY ADOPTS GUINEAS.

There are stories told of cats mothering puppies and dogs mothering kittens, and it is not uncommon for a hen to bring from the nest a flock of ducklings or perhaps a flock of young turkeys, but it is unusual to hear of a turkey hen adopting a covey of young guineas. In Clay county a female turkey wandered away from the barnyard and was not seen for more than two weeks, then reappeared with a flock of young guineas trailing after her. It is thought the turkey found a guinea sitting on a nest of eggs, drove the guinea off the nest and took possession, staying there until the eggs were hatched.

TO FURTHER IRRIGATION PROJECTS.

Since Governor Neff has come out as a pronounced advocate of flood water conservation and the promotion of irrigation, and the state Democratic platform has taken a similar stand, there is said to be reasonable expectation that the next legislature will appropriate a sum of money to make topographic surveys of all the streams in West Texas. Also there is pending in Congress with reasonable expectation of its passage the Smith-McNary federal aid to irrigation bill, which proposes the creation of a revolving fund of \$350,000,000, with which the government may be enabled to buy irrigation district bonds. This will encourage irrigation projects in West Texas, because it will provide funds at reasonable interest and with long time repayment provisions.

SUGGESTED WORK FOR CONVICTS.

No sooner was a permanent organization formed, at Waco, for the carrying out of a flood control and conservation program, than suggestions began coming into the state capital as to the best way to launch this program. The latest suggestion is from P. C. Weinert of Seguin, former state senator, who suggests that the convicts in the state penitentiary be employed in building the dams and reservoirs necessary for the conservation program.

Ex-Senator Weinert believes that the almost defunct prison system can be revitalized by this means and made an instrument of never-ending good, and the plan would materially lessen the cost of the flood control program.

The suspended sentence law, and the parole law regarding inmates of the state penitentiary were introduced and sponsored by Weinert while in the senate.

PRINT SCHOOL BOOKS IN TEXAS.

Several states have enacted laws requiring text books used in their public schools to be printed in the state. These states have compulsory education laws, and since they must provide text-books for the pupils, they have found, or at least assume to have found, that text-books printed within the state are less expensive than text-books printed outside the state. A movement is now on foot to have all text-books used in Texas public schools printed in Texas. This was discussed when the compulsory education law was enacted, it was given serious consideration when the constitutional amendment was adopted providing for a higher maximum school tax rate, and the rate was made high enough to provide a fund for printing text-books should the state undertake to do so. It is probable that the proposition will be brought before the next legislature.

INSURANCE COMPANIES EVADING TAXES.

Insurance companies that have not been lawfully admitted to write policies in Texas and yet are doing active business in the state are evading taxes amounting annually to several hundred thousand dollars, says John N. Scott, deputy state insurance commissioner, who estimates that companies not admitted to the state are writing each year approximately \$100,000,000 of insurance, about one-half fire insurance, and about one-half life insurance. The insurance department has prepared a bill, it is said, that will place a tax of one per cent on the face policy held by each policy holder of non-admitted companies. As it has been impossible to discover the non-admitted companies while they are at work selling policies, it is proposed to place the burden of the tax on the policy holder, requiring each, under penalty of a fine, to make report to the county tax assessor within 30 days after the policy is written.

GOATS IN TEXAS ZOO ADOPT BABY ANTELOPES.

Two goats at the Washington Park Zoo, El Paso, Texas, are now mothering a pair of baby antelopes captured on the plains south of Juarez. The antelopes are five weeks old and are thriving, says the New York World.

The goats at first showed some hostility toward their charges. Now they accept the two orphans as a matter of course, although they show little affection.

In striking contrast is the solicitude of a monkey mother in a nearby cage for her baby's digestion. Although he is getting to be a husky youngster, the mother still refuses to allow him to eat peanuts offered by visitors. When he slips by her and gets one in his mouth, she grabs him, boxes his ears and forces open his mouth, removing the peanut. Then she gives him a good scolding.

Cameron State Bank
Capital Stock \$60,000.00
Surplus and Profits \$45,000.00
Cameron, Texas.

The Cameron Herald

ESTABLISHED A. D. 1878

CAMERON, MILAM COUNTY, TEXAS,

THURSDAY OCTOBER 12, 1922.

TWENTY-TWO PAGES TODAY

NUMBER 24

S. P. Cross
Money To Loan—On farm lands at 8 per cent. No additional charges other than for abstracts, recording and notary fees. Office Over First National Bank, Cameron, Texas.

PENDELUM SWINGS BACK TO POSEY DEEP TEST WELL

DRILL NOW AT 2900 FEET AND
THROUGH THE AUSTIN
CHALK.

Considerable interest is being displayed in the S. A. Guiberson, Jr., No. 1 Posey well, six miles southeast of the city. Scores of automobiles are keeping the trail hot between Cameron and the Posey farm. The well is at an interesting depth around 2900 feet, the drills are through the Austin Chalk and the formation is now, blue shale. According to the predictions of the Geologists and others a pay sand should be picked up around the 3200 foot stratum, the formation now showing up is said to look very good, and is encouraging to the owners of the well. At the rate the drillers are going the well will be around the pay stratum in the next few days.

The well of the Lee Oil Company drilling on the Neihous tract in the Milam county shallow pool, is down at the 1200 foot level, the drillers are letting the 8 and one fourth inch casing follow the tools. This well is also causing considerable interest, it being a 2000-foot test.

The Milano Uplift Oil Syndicate number one Mon Ashley north of Milano and south of the Posey test, have the derrick up all ready for the tools. It is reported that this company will start rigging up as soon as the cable tools arrive.

The U. S. Tex Oil Corporation of Dallas, Texas, have completed taking over the Branchville block of acreage, and have contracted to start drilling on or before December 10th. This well will be located about 5 miles north east of the S. A. Guiberson, Jr., number one Posey, and will be nearer the town of Branchville, than the well that was started some time ago by Richardson and Company of Houston, on the Foster farm.

The Owens Petroleum Company number 9 Henry is on top of the pay around the 700 foot level, and is ready to be drilled in. It is said the well is a good one and will make 15 to 20 barrels when completed. The daily production of the Milam county shallow pool is now in the 350 to 400 barrel class. The field is far surpassing some of the older pools in the State.

TICK ERADICATION WORK IN COUNTY IS DISCONTINUED

COUNTY FACING QUARANTINE
AFTER NOV. 1, FOLLOWING
COURT ORDER TO STOP
DIPPING

Tick eradication work in Milam county will be discontinued after November 1. This action was taken by the Commissioner's Court at its regular meeting held this week.

The attitude of the Court in stopping the eradication work is that the results obtained do not justify the continued expenditure of public money.

The stoppage of the work means a quarantine of the county by the Federal Livestock Sanitary Commission and there will be no movement of livestock in the county.

The tick work has been in progress for the past four years with the result that some \$70,000 has been spent. Many sections of the county are still under quarantine, but a large area had been released because of the tick free sections resulting from the work in 1921. However, the stoppage of the tick work will mean a quarantine for the entire county.

The work has been hampered because of the lack of sympathy for the law and its provisions coupled with great difficulties in enforcement.

Rev. and Mrs. Ira F. Key motored to Marlin Sunday to attend the funeral of Dr. Betts. They were accompanied by Mrs. Hattie Stacy and Judge Jeff T. Kemp.

HISTORY'S MYSTERIES

COPYRIGHT BY THE WHEELER NEWSPAPER SYNDICATE

SHIP THAT NEVER CAME BACK

THE sea has its full quota of mysteries—ranging all the way from the depredations of Captain Kidd, through the strange affair of the Marie Celeste, and up to the disappearance of the collier Cyclops during the World war—but none of these contain elements any more remarkable than the vanishing of the President, one of the first of the steam leviathans to cross the ocean.

Eighty years ago, Englishmen and Americans alike, were rejoicing in the fact that steamers had succeeded in regularly crossing the Atlantic, that a voyage could be made in as short a time as two weeks, and that the first of the Cunarders, the side wheeler Britannia, had come safely into the harbor at Boston after the quickest passage on record. Steam, it was freely predicted, had conquered the sea, and men who had gone to London, spent nearly a week in England and returned within 30 days, were regarded as wonderful examples of the new-found marvels of trans-Atlantic travel.

One of the vessels which had been launched only a short time before, and which the English-speaking world hailed as the latest word in luxurious oceanic comfort, was the President. Two hundred and sixty-eight feet in length, 64 feet wide, and with a displacement of 2,360 tons, this liner was not as large as many of the ships which ply the inland waterways today—but she was the marvel of the hour in 1840, and when she sailed from New York on her ill-fated voyage in March, 1841, every craft in the harbor paid tribute to her size and her superior ability.

In April, however, reports began to filter in from Liverpool that the President was overdue, and throughout the spring and far into the summer there was an agony of suspense in England as well as in the United States—particularly as the passenger list of the missing ship contained the names of many prominent in public life, including Tyrone Power, hailed as the prince of American comedians, and George Glugston Cookman, whose eloquence was claimed to be superior to that of Henry Clay or Daniel Webster. The latter carried with him the first dispatch which Webster, as secretary of state, had written to England, and the superstitious of both sides of the Atlantic claimed to see a strange omen in the coincidence that the first President of the United States to die in the White House—William Henry Harrison—had passed away at the time when the ship which bore the name of his office began to be missed.

The fate of Power and Cookman, as well as that of the duke of Devonshire, and a hundred other passengers, has never been settled. The only ray of light that was shed upon the mystery was that a Portuguese brig had reported sighting a large steamer moving slowly under sail, but as the steamer did not hail the brig nor display any signal to indicate that she was in distress, no assistance was offered. As a memorial, a stone bearing the name of Capt. Richard Roberts, commanding the President, appears in a little churchyard near Queenstown, commemorating "the first officer under whose command a steam vessel ever crossed the Atlantic ocean." So far as Great Britain is concerned, this honor belongs properly to Captain Roberts, but ahead of him by 19 years, was an American, Capt. Moses Rogers of the Savannah.

Whether the President foundered in some violent gale—a theory which hardly appears to be tenable, as no other vessel reported trouble at this time—was crushed and sunk by an iceberg in the same manner that the Titanic came to her fate some seventy years later, or was utterly destroyed by fire—no man to this day has been able to tell; for not even a splinter or wreckage, or a lifeboat was ever found.

The President sailed from New York. She failed to arrive in Liverpool. That is all that is known.

Willard Chambers who has been in Cameron for the past several months with the Dodge car agency and with a tire and accessory stock at the Mack Harvey filling station, will move back to his former home in Bryan next week. Mr. Chambers owns a half interest in the Chambers-Wilson Motor Company, Ford dealers in Bryan and will move his accessory stock back to Bryan after the sale here which lasts through Saturday. He is selling this stuff at cost.

Mrs. H. F. Smith Sr., was a Temple visitor this week.

LOCAL AND PERSONAL

Mrs. Hattie Stacy of Houston accompanied Mrs. Key home and will be her house guest at the parsonage for a few days.

Mr. and Mrs. H. C. Meyers of Rockdale, were shopping in Cameron last Saturday. Mr. and Mrs. Meyers contemplate moving to Cameron within the near future and making this their home. A hearty welcome awaits them to our little city.

Oxsheer Smith, who has been suffering with a severe attack of Dengue, is again at the bank greeting his many friends.

Rev. C. T. Tally, of Marlin, passed thru here Saturday and was a guest at the Methodist parsonage for a few hours.

Mesdames W. B. Skelton and M. E. Casey attended the Baptist Association at Burlington last week.

Mr. and Mrs. William Culver of Davilla, were shopping in town Saturday.

Mr. and Mrs. Fred Davis of Sharp were in the city Saturday and were visitors in the home of Mr. and Mrs. Judd Davis.

Don Slocumb and boys attended the Bell County Fair at Midway last week. Mr. Slocumb reports that they had on exhibition some fine stock.

Jim English, who has a lucrative position with the Texas Company, at Tulsa, Oklahoma, is here for a few weeks visiting with his father, Judge Ed. F. English.

Mr. and Mrs. Newton of Houston came up Friday for a few days visit with Mrs. Newton's parents, Judge and Mrs. Ed. F. English. Mr. Newton left Monday for Coleman where he is to do auditing for a few days.

Mrs. Lotta Bigbee spent the week end in Marlin, guest of her sister, Mrs. Cooley.

Miss Myra Lankford has returned to Smithville after a pleasant visit with her parents, Mr. and Mrs. A. M. Lankford.

Mr. and Mrs. N. O. Kennedy of Ben Arnold were in Cameron Saturday. Mr. Kennedy is a prosperous farmer in that section.

Miss Gena Sanders of Minerva was in Cameron Saturday, and reports her brother in San Antonio quite ill; her mother and sister having gone down the first of the week to attend his bedside.

Mrs. Dave Link and daughter, of Walker's Creek community, were trading in the city Saturday.

Irvin Clarie, after a severe attack of Dengue is now on duty at the Citizens Bank.

Miss Mary McCown has returned from a very pleasant visit with friends in Austin.

Mrs. Ira F. Key returned Friday afternoon from Houston where she attended the "International School of Missions" which was held at the First Methodist church, that city. There were over two-hundred and fifty delegates in attendance. The feature of this gathering was to meet Miss Frances Bates Patterson, a returned missionary from India, who conducted the foreign study book "Building With India."

Do you want to buy a good time piece? Buy you that good watch at R. H. Johnson's Jewelry Store.

Mrs. James Watson returned from Eddy last Friday where she had been visiting her mother.

Mr. and Mrs. T. O. Hamilton of Rogers were shopping in our city Tuesday.

Miss Leilla Woolley, our popular County Tax Assessor, is back at her desk after a seige of dengue fever.

Mrs. J. Koy Williams, of Caldwell, was a visitor in the home of Mrs. W. O. Triggs this week.

Miss Jerusha Rogers is convalescing from a severe attack of dengue fever.

Mrs. Lotta Bigbee returned from Temple Tuesday where she attended the funeral of Mrs. M. E. Hobbs, an old settler of Temple and the mother of Mrs. Allen Hooks.

Mrs. Paul Webb is ill with the dengue fever this week.

Reports come from Austin that Miss Minnie Wolfe is enjoying her work at the University this fall.

Miss Ruth Cammer will take up her duty as teacher at Bryant Station next Monday.

Mr. and Mrs. H. C. Keith and children of Cameron have gone to Rosenberg to attend the funeral of W. F. Shoeman, father of Mrs. Keith. He died at his home there Wednesday after an illness of several months. The many friends of Mrs. Keith will extend their sympathy to her in the loss of her father.

Rev. E. L. Shettles of Austin filled the pulpit at the Methodist church last Sunday, both morning and evening. Rev. Shettles was pastor at this place several years ago, and his sermons always delights his hearers.

The Open Forum

In this issue the Herald is setting aside space to be devoted each week to the discussion of matters of interest to the people. This column will be known as the "Open Forum" and the Herald invites communications to the column both because of the necessity for expression from the people about public questions and because it affords means for this paper to serve its patrons.

The Herald is offering a prize of \$2.50 for the best title suggested for this column to appear and run as the permanent heading. Read the column this week. It contains matter of interest. Think of a good head for the column and win the prize.

THE SECRET OF GLAMIS CASTLE

THE grim walls of Glamis castle, in Scotland, have concealed a mystery for a number of centuries—concealed it so well that no hint of what it is or whence its origin, has ever been definitely brought to light. But that the existence of the secret is well known throughout the kingdom is apparent from Sir Walter Scott's reference to a secret chamber in the castle which "by the law or custom of the family, must be known only to three persons—the earl, the heir and the third in the line of succession." "The popular version," adds the famous novelist, "is that there is some horrible remembrance connected with the secret which has existed for the past two or three hundred years."

One writer claims that the mystery concealed in the secret chamber was a human being—half frog and half man—and recounts the story of the Countess of Glamis, who finally succeeded in penetrating to the hidden room, only to die of horror at what she found there. This story, while apparently well authenticated by writers of the period, has little foundation in fact—apart from the detail of the sudden and unexplained death of the countess, who may have come to her end in any one of a number of ways, and, in order to cover up the manner of her assassination or accidental death, it is more than possible that the story of the "chamber of horrors" was spread broadcast through the surrounding country.

Another version of the secret of the castle appears in an old history of Scotland, where it is stated that "there is one chamber in the castle in which, some centuries ago, two gamblers were walled in and condemned to continue their ghostly play, and where the rattling of the dice is still to be heard. The earl of Strathmore and his eldest son, Lord Glamis, must each hear this once, and it is related that the present lord has not forgotten the effect it had upon him." But, unless stage-managed in a manner worthy of Belasco—with bluish lights, skeleton hands, and a dice box suspended in mid-air—it is hard to see how the mere sight of a room where a not unusual torture was practiced centuries ago, could have such a profound effect upon those who visited it, nor how it would lead to such extreme measures for the preservation of secrecy.

Still another story, and one which appears to possess elements of horror and at least an approach of plausibility not to be found in the other legends, is that which appeared in print in England only a few years ago: "In the Castle of Glamis," stated the writer, an eminent authority on such subjects, "is a secret chamber which holds (or is reputed to hold) a monster who is heir to the title and property, but who is so hideous that it is necessary to keep him out of sight and possession. The secret is known to only three persons, because, as the deformed man is the rightful earl of Strathmore, he must be concealed in order to safeguard the title of the present earl, but the same misshapen aspect which renders his imprisonment essential has also prolonged his life far beyond the appointed span.

"That there is a secret room in the castle is a fact well known, not only in the neighborhood, but to all who have made an examination of the structure. Placed below the level of the ground, it is apparently reached through a staircase, concealed behind the paneled walls of one of the many large rooms on the first floor. Those who retell the story of the monster supposed still to inhabit this chamber declare that it is half reptile and half human, thus accounting for the fact that it has survived far more than the usual span of a man's life—while others declare that the creature died years ago, but that its mummified body remains as a warning to the new heirs that their tenancy of office is founded on deception, for the tales about the chamber agree in only one particular, that its occupant is the true earl of Strathmore."

The truth or falsity of these suppositions has never been settled, but the fact remains that Glamis castle hides a secret of some kind, which will never be disclosed until the old pile is torn stone from stone.

Mr. and Mrs. R. R. Tyson, Carl, Billy and Eunice Tyson were visitors to Calvert last week.

OFFICERS RAID CRAP GAME AND SEVENTY FIVE ARE ARRESTED

BIG VICE RAID BY SHERIFF
NETS MANY PRISONERS EARLY
SUNDAY MORNING

In a gambling raid last Sunday Sheriff Blaylock, assisted by Deputies John Flemin, Chas Sens, Chester Huffman and Frank Boggans, surprised a party of about 75 gamblers on a farm across the river from Cameron and made a large number of arrests.

Eighteen prisoners were brought to Cameron and lodged in jail and 26 complaints were filed in the justice court by Constable Chas. Sens.

The gamblers consisted of both negroes and white men. The officers made their way into the games and were not detected until they were in the act of making arrests. A stampede followed, but a sufficient number of deputies were on hand to corral the crowd.

SENATE INJUNCTION TAKEN TO DALLAS

MATTER REMOVED FROM HANDS
OF NAVARRO DISTRICT
COURT.

Austin, Texas, Oct. 10.—An appeal from the temporary injunction granted by Judge Hawkins Scarborough in the Navarro county district court was filed in the Fifth court of civil appeals at Dallas today, Attorney General Keeling announced late this afternoon. The appeal takes the injunction proceedings against the candidacy of Earle B. Mayfield for United States senator out of the jurisdiction of the district court, Keeling stated. It dispenses with the hearing at Corsicana, which was set for Oct. 16.

The action of the attorney general acting in behalf of Secretary of State S. L. Staples, against whom the injunction was directed, was chosen in place of filing a motion in the district court to set aside the temporary injunction. It came unexpectedly to those involved in the suit here.

CIVIC LEAGUE TO MEET

Notice is given that the Civic League will meet in the City Park Friday afternoon at which time officers will be elected for the next year.

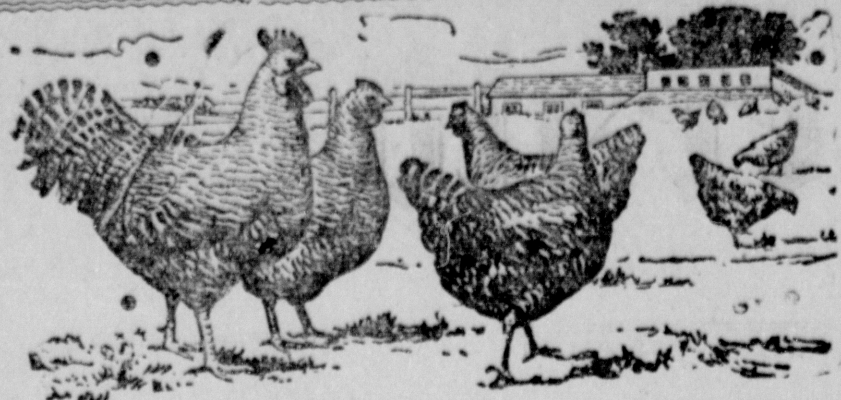

DR. I. F. BETTS DIED

Dr. I. F. Betts, Conference Sunday School Field Secretary of Texas Conference, died at his home in Marlin last Friday night at eight o'clock, after a couple of weeks illness from dengue, when other complications set up.

Dr. Betts will be remembered by a large circle of friends and acquaintances, as he was Presiding Elder here for several years.

Funeral services were conducted by Dr. C. T. Talley and Rev. H. W. Knickerbocker at the First Methodist church in Marlin last Sunday afternoon at three-thirty o'clock. Remains were laid away in the Marlin cemetery.

Mr. and Mrs. Leo Wilkerson and little daughter Zora Clark, left Cameron Tuesday for Dallas where they will attend the Dallas Fair. Mr. Wilkerson goes to attend the District meeting of the Overland car distributors.

POULTRY EXPERT GIVES EASY CULTURE TESTS FOR SEPARATING POOR LAYERS.

By F. W. KAZMEIER.

We have discussed part of this work in a previous article, but we deem this phase of the work so very important that we wish to enlarge on the subject. We wish to state here that The Star-Telegram readers that keep chickens or are contemplating keeping chickens, will find this article worth reading carefully. In these days of hard competition even in the poultry yard, it behooves all of us to know our chickens and their habits, their strong points as well as their weak points. One thing we would like to know, and that is to be able to tell how many eggs a hen will lay in a year. We would like to be able to tell their fortune. First, let us call attention to the fact that the latest information makes it possible for us to look at a chicken, examine her closely, subject her to a rigid test and then foretell her egg production very closely. Telling the good layers from the poor layers is not guesswork. It is easy to divide any flock of chickens into three groups, good layers, poor layers and medium layers. Careful study, close observation and careful handling of hens should enable anyone to know his hens sufficiently to be able to tell how many eggs they will lay in a year or about how many they have laid.

Look at a horse's head and you can see the horse like you were looking at it through a mirror. The head of a horse is a great factor in disclosing the qualities of the horse. The same applies to other stock and chickens as well. Look at the head of chicken and you can tell its fortune. A good producing hen has a stout, well curved beak, short, a bright prominent eye a red waxy comb and a refined lean appearing head. The best layers are friendly, strong, active, healthy, well formed and medium in size. The poor layer has a long, slender beak, eyes are listless, shrunken. Eyelids are large and droopy, face is pale, comb is small, shriveled up, dry and coarse. The same applies to wattles. The poor layer has a crow head or more of a masculine head. The good layer has a very intelligent and feminine head. The good layer looks a picture of health, her eyes stand out like shoe buttons, her face is very bright red, she sings, is happy and appears busy all the time.

It stands to reason that a hen that lays 200 eggs must have a different body and type from the hen that lays only 100 eggs. The body of the hen is the factory. The 200-egg hen has more machinery or at least better developed machinery, and, of course, she requires more room. It would be just as true to say that a factory putting out 200 automobiles in a year does not have to be larger than a factory putting out only 100 automobiles in the same length of time. A heavy layer needs lots of working room in her body. For this reason she has an entirely different shaped body. The best way of studying body conformation is to take the hen in the hands. The good or heavy layer has a good chest development, a long, straight smooth, flat back, a straight soft keel. The hips are well covered with flesh and the rump is wide back of the hips, in heavy layers. The hips in a poor layer are apt to be prominent and very poorly covered with flesh. The good layer is deep in body or wide between the backbone and keel bone. The good layer has a well developed breast and a full, prominent crop.

It is said that you can tell something about the quality of a milk cow by feeling the texture of the skin. This seems to apply to an even greater extent in chickens. We have found that the 200-egg hen has a skin that over the breast is soft, oily, pliable, having a texture that resembles the very finest of chamois, while in the 100-egg hens the skin is likely to be dry, coarse and rough, giving the impression of parchment. The keel bones and pelvic bones in the good layers are thin, soft, pliable and far apart most of the time. Exactly opposite is true in the case of the poor layer; here these bones are coarse, thick, hard and close together most of the time. The abdomen in good layers is large, soft and full. In poor layers it is small, dried up hard and often in old hens among the larger breeds, baggy. The shanks of good

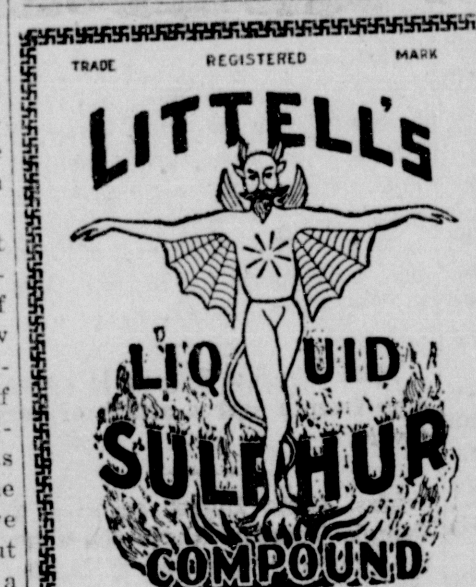

shanks and beak as well as other parts, because they have no other place to divert it to.

Systematic culling is rapidly becoming a farm practice, and represents a saving in Texas alone of many thousands of dollars. Where culling is properly done, there need be no worry that some of the good ones may be culled out, because as a rule we always give the hen the benefit of the doubt.

In the Fall of the year is the only time to cull. At that time a hen is at the end of her year's production. Her year's work clearly manifests itself; if she has worked hard and the other hand if she has been loafing she also shows that. If a hen has laid many eggs, she shows it, on been a poor layer, it is a pretty safe bet she will be a poorer layer another chance. Cull them. Sell them. In the months of October and November culling may safely and profitably be conducted.

Culling represents a saving of feed, and also prevents these poor layers from getting into the breeding pens, and thus reproducing more like them. Any one who thinks he has no poor layers in his flock is surely badly mistaken. The average flock consists from 25 to 50 per cent and some times more of hopelessly poor layers, that are boarders and loafers. We have culled out as many as 60 per cent of an entire flock without affecting the egg-production. Just see what a saving of feed this represented. Many farmers can earn a nice sum of money by going into their flocks and culling out the poor layers now and selling them. Don't wait too long. Now is the time to do it. Turn the poor layers into cash.

Texas is fortunate to have a large number of county agents, both home demonstration agents and agriculture

It is a powerful and scientific combination of sulphur and other healing agents for the relief and cure of diseases of the skin. It is especially effective in the ITCHING VARIETIES; giving instant relief from the itching and smarting sensations and by its germ-destroying properties it exterminates the microbe which is the cause of the eruption, thus curing the disease completely. Littell's Liquid Sulphur Compound is used in all cases of Eczema, Tetter, Barber's Itch, Psoriasis, Herpes, Rash, Oak and Ivy Poisoning, also for relieving the annoyance caused by chiggers and mosquito bites.

In the treatment of ECZEMA—the most painful and obstinate of all skin diseases—it is one of the most successful remedies known.

\$25.00 Reward Offer Withdrawn By Klans

On account of the fact that Klansmen might be disqualified for jury service in Milam county, being interested parties to the transaction, the Klans of Milam county have decided to withdraw their offer made some weeks ago of a reward of \$25 to any officer in the county for the arrest and conviction of bootleggers. We regret very much to have to do this, but we feel that we should not shirk jury service when called on for that duty and on that account alone we are compelled to take this action.

MRS. W. W. LONG NARROWLY
ESCAPED FATAL INJURY.

While Mr. and Mrs. W. W. Long were out for a short drive Sunday afternoon just before time for church their car was struck by a passing car in which some young folks were riding and in the compact Mrs. Long was thrown through the windshield of their car, sustaining a severe wound on the left hand and a terrible blow on the forehead which for a time left her in an unconscious condition. The mere fact that Mrs. Long wore a sailor hat at the time of the accident kept the force of the blow on the head from proving fatal. Her whole face is blackened as a result, and she has suffered intense pain since that time. The laceration of the hand begins at the little finger and extends to the wrist or nearly there.

Mr. and Mrs. Long were on the San Gabriel road and at the time of the accident were en route home, meeting the car on a small bridge near town. It seems that neither of the party saw the other until both had gotten on the bridge. One rear wheel of Mr. Long's car was torn off and the car thrown in such position that Mr. Long could not extricate himself or Mrs. Long without assistance.

The whole affair is very much regretted but Mr. Long stated to a representative of the Champion that he does not blame the driver of the other car for the reason that, from all indications, the accident could not well have been avoided.—Thorndale Champion.

W. A. GAMBRELL WAS
BURIED LAST SUNDAY.

Willis Arthur Gambrell, age 45, died at a sanitarium in Taylor last Saturday, after an illness of about a month.

Mr. Gambrell was born in Milam County, at Gano, in 1885. He resided with his parents on their farm up until about fourteen years ago, when he moved on a nearby farm, where he was living at the time of his death. He is survived by his wife, and three small children, two boys and one girl. His parents, Mr. and Mrs. W. H. Gambrell, three brothers, Charles, S. F. and A. E. Gambrell and one sister, Miss Lillian Gambrell.

Funeral services were held at the family residence Sunday afternoon, Rev. I. B. Manly, pastor of the Methodist church here officiating with burial in the Pleasant Retreat cemetery.

The Champion joins the bereaved family and sorrowing friends in extending them our sympathy in their hour of grief.—Thorndale Champion.

NOTICE BY GUARDIAN OF AP-
PLICATION OF MINERAL
LEASE OF REAL ESTATE
STATE FOR WARDS.

No. 1952—Guardianship of the persons and estate of Chas. Hall Massey and Eugene Massey, minors:

In the County Court of Milam County, Texas.

Notice is hereby given that I, B. D. Massey, guardian of the persons and

estate of Chas. Hall Massey and Eugene Massey, minors, have this day filed my application in the above entitled and numbered cause for an order of the County Judge of Milam County, Texas, authorizing me as guardian of the estate of said wards, to make a mineral lease upon such terms as the court may order and direct of the following described real estate belonging to the estate of said wards, to-wit:

All that certain tract of land on the J. J. Acosta grant situated in Milam County, Texas, on the waters of Al-ligator Creek, particularly described as follows: Beginning at a stone for the N. cor. of L. E. S. Williams tract in W. Bry. line of Nester Clay 5 1-2 Leagues; thence S. 19 E. 85 vars. to a stone for the N. W. cor. of Rebecca Ragsdale Survey an Elm brs. 11-12 E. 66 1-2 vars, another brs. OPEN NOSTRILS! END
A COLD OR CATARRH

How to Get Relief When Head and
Nose are Stuffed Up.

Count fifty! Your cold in head or catarrh disappears. Your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more snuffling, hawking, mucous discharge, dryness

or headache—no struggling for breath at night.

Get a small bottle of Ely's Cream Balm from your druggist and apply a little of this fragrant antiseptic cream in your nostrils. It penetrates through every air passage of the head, soothing and healing the swollen or inflamed mucous membrane, giving you instant relief. Head colds and catar-

rh yield like magic. Don't stay stuffed-up and miserable. Relief is sure. (Advertisement.)

Colds Cause Grip and Influenza

LAXATIVE BROMO QUININE Tablets remove colds. There is only one "Bromo Quinine" with GROVER signature on box. 30c.

All Business Men Have
Checking Accounts

It formed the basis upon which they were able to build their business.

A Checking Account enabled them to keep a complete record of every business transaction, and it built up in them a regard for business method, caution and thrift which has made possible their success.

We will be glad to help you get started.

Citizens National Bank
"The Largest Bank In Milam County"

Cotton
Stupendous Extravaganza
"Passing Parades of 1922"

Coming direct from highly successful seasons in both Chicago and New York to entertain you. Probably the most complete, elaborate and entertaining musical revue ever brought to the Southwest. Will be the feature event in the Coliseum the first week. Also world-famous Ice Skaters. Magnificent scenic effects—80 dainty, graceful girls—comic comedians—snappy costumes—splendid music. Comfortable seats for 10,000 every performance.

ton

Queen's Coronation Ceremonies followed by the Queen's Ball will be held on Tuesday night of the second week in the Coliseum. It is by far the most brilliant event held in the Southwest. There will be Princesses appointed by President Harding and the Governors of every State, and from foreign countries, in attendance. Two nights later the Society Ball, presenting debutantes from all over the Southwest, will be held in the Coliseum. Complete change of decorations. The most elaborately staged events ever held in this country.

Pal-

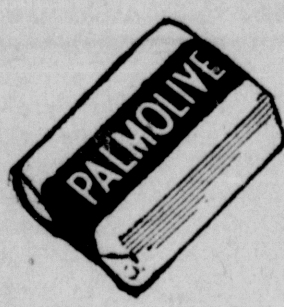

Other special features of this year's Cotton Palace Exposition International you want to see are: 39 Centuries of Cotton, a wonderful portrayal of the progress in the cotton industry; auto races; complete agricultural and livestock shows; the Canadian Government is sending several carloads of exhibits; the Texas A. & M. College will have a big display; the women's department will be larger and more interesting; the United States Government display; the Kennedy Shows will be new and there will be more of them; there will be free acts every afternoon and night, and many nights of informal dancing in the Coliseum.

ace

Make a note right now that the Cotton Palace Exposition International will open Saturday, October 21st, and arrange your plans to be on hand. There will be 16 days and 16 nights of wholesome entertainment and education, fun and frolic.

A GIRL'S FACE IS HER
FORTUNE

Because it is the greatest of all womanly charms, a skin which is fresh, smooth, and alluring with the radiance of health, predicts a happy future.

Don't be content to have a pale, yellow, and blemished complexion—begin at once to remedy these defects.

Every girl can have a beautiful attractive skin if she will only learn to give it proper care.

Thorough cleansing with a fine mild soap once a day, is the secret. Coldcream is beneficial when applied to a clean skin, and rouge and powder are harmless beautifiers—but start clean every day on a clean foundation.

Keep your skin active and it will be clear, fresh, youthful and attractive.

Soap to be thorough need not be harsh. The mildest toilet soap is the most thorough of cleansers, as you will know after you try Palmolive.

Its mildness and thoroughness are due to the same source—the scientific blending of Palm and Olive oils, the natural cleansers discovered thousands of years ago in ancient Egypt and made use of by Cleopatra.

Palmolive freshens, livens and stimulates the skin, leaving it delightfully fresh and rosy.

You can buy Palmolive Soap at all first class groceries and drug stores.

FREEDOM OF THE PRESS.

"If the great daily papers of the United States are not controlled by a power behind, which uses their influence for private and personal rather than for public and economic purposes, why is it that none of them carry criticisms against the honesty of the press when such are uttered by the people whose experience and services to the country entitle them to be heard?"

The question is often heard in Congress. Senator Heflin, of Alabama, said in a speech to the Senate recently:

"I am not afraid of the press. I am the firm friend of the honest press. God knows I would not hamper the press in the discharge of its duty, or take away from it any of its rights and privileges to give the news to the people, and print the views of those who own the papers; but I am against the scheme that some of them have of suppressing the news of events of importance that take place right here in this Chamber, around this Capitol, that the people of the country are entitled to know about. Why is it that you never see a line about a lot of important matters discussed in this Chamber?"

This speech was reported in few if any of the great metropolitan dailies, nor was the interlopation made by Senator Watson, of Georgia, with Senator Heflin's permission. Senator Watson said in part:

"The time is coming when the press will have to be free if it wants to exist. This country can not live and tolerate a press which it knows is a hireling press. It will not pay for such papers. It will not advertise in such papers. People will not buy from those who advertise in such papers, and the worst of the fight is past."

"When the espionage law was passed and so many hundreds of newspapers were crushed by arbitrary orders of the Post Office Department, freedom of press was more in danger than it ever had been since our Government was established or since Charles Fox, Lord Grey and John Wilkes had made their noble fight in England for the freedom of the press, and Thomas Erskine had made his glorious fight for trial by jury instead of arbitrary directions of verdicts by judges. That time is coming again. The forces of conflict are arraying themselves against each other again. That battle is irresistible. Nothing on earth can stop it and nothing on earth can silence the people. They are going to be heard, or we will have a revolution in this country."

The foundation stone on which America is built is liberty. Liberty of speech, liberty of thought, liberty of political action, liberty of conduct within the laws of the land, liberty to worship God, liberty from tyranny, oppression, slavery; liberty of opinion. Take away liberty and there is no United States.

A "controlled" press is a blow at liberty. A great newspaper is a public institution. Its owners, publishers and editors have the American right of liberty to their opinions, personal and political; they have no moral right to attempt to color the thoughts of their readers by suppression or alteration of the truth. A newspaper which suppresses truth, or one which changes truth to lies for its own purposes is no newspaper, it is merely then a mouthpiece.

Great newspapers are expensive, they require vast capital to conduct. As such they can be controlled if there is interest enough behind them to buy them. But there is not money enough in America to buy and control all the papers of the United States. The country press, the smaller papers, the weeklies, the county-seat papers are too numerous and too red-blooded with patriotic American owners and editors to be bought.

Against the evils of a controlled press the American people must fight, and fight hard; the penalty of losing the battle is to see the country a democracy only in name, an oligarchy in fact. In that battle the field artillery and skirmish line, the trench diggers and the advance guard is the country press.

The flame of truth is white hot and

fatal to evil.

Lucky the people who read the Journal of a man unafraid of its heat; fortunate the editor who can look his readers in the face and say "I kept the holy fire."

AN APPEAL TO DEMOCRATS.

The individual man and woman power of the Democratic party in Texas must put dollars into the party's treasury if the Democrats take advantage of the extraordinary opportunities that are being presented in doubtful states, according to word received by Miss Margie E. Neal and John C. Harris, joint chairmen of the Texas Finance Committee of the Democratic committee from headquarters in Washington. Miss Neal and Mr. Harris have been busy throughout the past week organizing their forces in the thirty one senatorial districts for a popular drive for subscriptions from all Democrats. Not only is a rare opportunity offered by the wrestling of several important states from the republicans but both parties are lining up already for the presidential drive of 1924 and the Democrats can not afford to lag behind the procession now Mr. Harris said.

The campaign is taking hold in several districts according to reports sent into state headquarters at 319 Western Indemnity building. In the fifth senatorial district Mrs. J. L. Lovejoy, prominent club and civic worker has headed the list with a substantial subscription according to a message received from McKinney. It was not disclosed how much money has been raised there but it was indicated that Mrs. Lovejoy's example will be followed by others in all parts of the district. Mrs. Lovejoy is district chairman for rural welfare of the State Federation of Women's Clubs and formerly was State Chairman for that work. She has been president of the Collin County Federation of Women's Clubs since its organization and was identified prominently with every activity in Collin county to aid in the prosecution of the war.

What is most desired in Texas Mr. Harris said, is the interest and co-operation of every man and woman Democrat in the state attested by at least a one dollar subscription.

"There is a tendency this year on the part of the Democrats of Texas," Mr. Harris said, to neglect their party. Hard times and schism caused by factional strife have made good Democrats overlook the fact that their service are needed now more than ever before in the history of Democracy. If the principles laid down by Thomas Jefferson are to be kept alive and if they are to flourish in their full vigor, as they have done heretofore, every good Democrat must rally now to the standard. We make a most urgent appeal to every true and loyal Democrat in the whole State of Texas to send at least one dollar to the committee to be used in the campaigns throughout the country next month.

"Democracy is on trial. A golden opportunity has been presented by the signal failure of the republican party to keep one single pledge it made to the people two years ago. Congress had adjourned and although in full control the republican party has not passed one single solitary constructive measure. On the contrary it has neglected to enact legislation imperative for the welfare of the business of America. Through their inability to meet the issues they have unwillingly challenged every good Democrat to rally to the Standard.

"Congress has adjourned and during the next few weeks we shall hear the echoes of its meaningless deliberations on the stumps. The Republicans will be out in full force and our dollars must make it possible for the Democrats to meet them on a fair and equal footing.

"If the chairman in the district and counties fail to see any loyal Democrat they may mail their checks direct to the State headquarters 319 Western Indemnity building, made payable to the Chairman of the National committee and receipt will be mailed out from this office at once."

THE TOWNER - STERLING BILL.

Why should all the great seats of learning in the United States be built

upon a foundation of private capital, or conducted as co-operative or as money-making institutions? Why should not this Nation found, conduct, and maintain forever a university to give its youth the opportunity which questions of finance prevent many from taking in great private universities?

John H. Coyles, Sovereign Grand Commander of the Ancient and Accepted Scottish Rite of Freemasonry for the Southern Jurisdiction, thinks we should have such a national seat of learning, as well as a Department of Education in the Government, and laws requiring the compulsory attendance of school children through the eighth grade. Nor is he alone in such things; of the millions who are earnestly advocating the immediate passage of the Towner-Sterling bill, which will create a Department of Education with a Secretary in the President's Cabinet, a very large number agree with Captain Coyles in his statement before the One Hundred and Tenth Supreme Council meeting of the Northern Jurisdiction, in Cleveland.

A National University would offer to students who could pass a certain examination or who could show certain educational credits, an opportunity to gain that larger outlook, wider knowledge, and greater vision which is the chief end of higher education, at a not prohibitive expense. It would be a training school for our civil youth commensurate in standards to our West Point and Annapolis. It would send forth a constant stream of young people, trained in citizenship and Americanism, apostles of education, disciples of the true patriotism, a leaven for industrial and social unrest, counter irritant for Bolshevism and anarchism.

The country's universities do well; why confine such well doing to those able to afford them?

RED PEPPER FOR RHEUMATIC PAIN

Red Pepper Rub takes the "ouch" from sore, stiff, aching joints. It cannot hurt you, and it certainly stops that old rheumatism torture at once.

When you are suffering so you can hardly get around, just try Red Pepper Rub and you will have the quickest relief known. Nothing has such concentrated, penetrating heat as red peppers. Just as soon as you apply Red Pepper Rub you will feel the tingling heat. In three minutes it warms the sore spot through and through. Pain and soreness are gone.

Ask any good druggist for a jar of Rowles Red Pepper Rub. Be sure to get the genuine, with the name Rowles on each package.

The Quinine That Does Not Affect The Head Because of its tonic and laxative effect, LAXATIVE BROMO QUININE (Tablets) can be taken by anyone without causing nervousness or ringing in the head. E. W. GROVE'S signature on each box.

Strength from Ironized Yeast Simply Glorious

It Follows a Natural Law Which Never Changes or Fails. The Entire Body Quickly Feels New Power!

"I've just about gone to pieces!" Do you know that getting back strength is comparatively easy? But do you realize that it is almost impossible to get back your strength by means of unnatural drugs? Do

Madam, Ironized Yeast Will Build You Up Amazingly and Quickly!

you know that about one woman out of every three is exhausted because of nerve and blood starvation? The remarkable power of yeast-ironized has been proven. There is now no further excuse for being weak, sick, run-down. Ironized Yeast contains the tremendous natural building forces of vitamins and iron, and it builds and strengthens in half the usual time. Do you know why? Ironized Yeast is not a mere mixture of yeast and iron, but yeast ironized, which is a substance all by itself. That's what makes Ironized Yeast the most powerful, natural builder in the world today. You will find a new strength coming over you, your cheeks will get rosy, your eyes sparkle, your appetite will be sharp, you will discover what you eat, your blood will become rich, your energy will be more than equal to your ambition. Get a package of Ironized Yeast today, and beware of substitutes. Sold at all drug stores at \$1.00 a package. Each package contains 60 tablets, each tablet is sealed. They never lose their power. Mfg. by Ironized Yeast Co., Atlanta, Ga. Health and strength are now up to you.

HALF A LAW.

To the Editor of the Open Forum. Cameron, Texas.

Dear Sir:

I have read with interest the new ordinance passed by the city council regulating the slaughter of animals. It is a good law, well framed to meet a crying need; but it only goes half way, there is no provision for inspection of our slaughter-houses or of the meat displayed for sale in our markets.

Even if the animal slaughtered be ever so healthy, it may pick up the germs of dangerous diseases in the slaughter-house, or in the market; and it may become putrid in the hands of the dealer through insufficient refrigeration. The present ordinance is designed to see that we get palatable meat. I suggest that another ordinance be passed to insure that we get healthy meat, free from germs. It is a well known fact that meat should be cooled for from twenty-four to forty-eight hours before it is

consumed, and that when so cooled it is much more palatable.

There are state laws dealing with this subject, but they do not entirely cover the local situation, and they are enforced by state officers who visit out town only about once a year. If we want good meat, we ought to have a city ordinance dealing with this important subject to be enforced by designated city officers. If the officers on whom that duty would naturally fall do not want to perform the duty without extra compensation, fire them and get some one who will.

Respectfully,
BEEF-EATER.

Notice is hereby given that on August 8, 1922, the County Court of Milam county, Texas, granted to A. N. Green letters testamentary upon the last will and codicil of Mrs. Caroline Yoe, deceased, and that the postoffice address is Cameron, Milam county, Texas, is now the duly qualified executor of said will and that all persons having claims against the deceased, are required to present the estate of the said Mrs. Caroline Yoe, same within the time required by law.

Respectfully,

A. N. GREEN,
Executor of the last will and codicil of Mrs. Caroline Yoe, deceased.

You Do More Work,

You are more ambitious and you get more enjoyment out of everything when your blood is in good condition. Impurities in the blood have a very depressing effect on the system, causing weakness, laziness, nervousness and sickness.

GROVE'S TASTELESS CHILL TONIC restores Energy and Vitality by Purifying and Enriching the Blood. When you feel its strengthening, invigorating effect, see how it brings color to the cheeks and how it improves the appetite, you will then appreciate its true tonic value.

GROVE'S TASTELESS CHILL TONIC is not a patent medicine, it is simply IRON and QUININE suspended in Syrup. So pleasant even children like it. The blood needs Quinine to Purify it and IRON to Enrich it. These reliable tonic properties never fail to drive out impurities in the blood.

The Strength-Creating Power of GROVE'S TASTELESS CHILL TONIC has made it the favorite tonic in thousands of homes. More than thirty-five years ago, folks would ride a long distance to get GROVE'S TASTELESS CHILL TONIC when a member of their family had Malaria or needed a body-building, strength-giving tonic. The formula is just the same today, and you can get it from any drug store. 60c per bottle.

AUTUM FIRES.

In the other gardens
And all up the vale,
From the Autum bonfires
See the smoke trail!
Pleasant summer over
And all the summer flowers,
The red fire blazes,
The grey smoke towers.
Sing a song of seasons!
Something bright in all.
Flowers in the summer,
Fires in the fall!

—R. L.

A BEAUTIFUL ROSE PARTY.

A charming affair, artistically planned, was the "Rose Party" given last Thursday afternoon by Mrs. Ben Atkinson at her pretty bungalow home on Hefley Heights, to her Forty-Two Club, and a few invited friends.

A motif of pink and green was successfully carried out in the decorations; sprays of queen's wreath and roses being used throughout the reception suite.

Six tables of players assembled for the afternoon's pastime. Table covers were of green, tally and score cards were dainty rose designs. There were three kinds of eighty-four favors which consisted of little bottles of Rose perfume, small baskets of roses, and miniature bouquets of roses. A number of games were played, and at the close of the delightful afternoon high score for the guest was won by Mrs. Jewel Barmore, and Mrs. Rush Thomas won high among the club members. Mrs. W. A. Gillon won most of the eighty-four favors, and in the cut was Mesdames Overton, N. H. Butts, Andrew Freeman, W. A. Gillon, J. C. Martin and E. A. Wallace.

At the conclusion of the games Mrs. Atkinson served a delicious salad course which consisted of tunny salad, fruit salad, potato chips, sandwiches

and ice tea. The plate favors were hand-made satin rose sachets. The table favors were lovely bud vases of roses.

Mrs. Atkinson was charmingly assisted in serving by Mrs. Overton, sister Mrs. B. Slocumb, Misses Emma Atkinson, Mary Virginia Atkinson, nieces, and her three charming little daughters, Louise, Kathrine and Florence. This afternoon will be remembered as one of the most enjoyable meetings that the Club has had.

BIRTHDAY PARTY.

Baby Patricia Batte, little three year old daughter of Mr. and Mrs. R. L. Batte, Jr., was tendered a delightful birthday party last Friday afternoon from four to six o'clock.

Forty-five or more little guests began to arrive on time, some alone while others were accompanied with their mothers. More than two hours of fun and frolic was indulged in, when Mrs. Batte, assisted by Misses Marybelle Batte, Doratha Joyner and Hilda Burne, served Ice cream cones and cake, later a large birthday cake was brought out lighted with candles, which were blown out by the two honor guests. The cutting of the cake for emblems was the source of much merriment.

The children came with happy little faces, laden with pretty gifts of all kinds for their little friends.

BAPTIST AUXILIARY.

At the meeting of the Baptist Auxiliary, circle number one met with Mrs. John Dobbins, which was a Bible Study, after which Mrs. Dobbins served a salad course. There were nine members present.

Circle number two met with Mrs. Geo. A. Thomas. There was a good attendance and much interest. Light re-

freshments were served.

Circle number three met with Mrs. Wm. Henderson, with fine attendance. Refreshments were served and a profitable and enjoyable afternoon was spent.

Circle number four, or Young Ladies circle met with Miss Winnie Henderson as leader, at the Baptist church. Refreshments were served to a good attendance.

PRESBYTERIAN AUXILIARY.

Monday afternoon the ladies of the Presbyterian church held a "Rally Day" meeting for the Women's Auxiliary, and had a distinguished guest in the person of Mrs. Forest Farley, of Austin who is the Presbyterian President. The following program was rendered:

1. Piano solo by—Mrs. Jeff Avera.
2. Prayer by—Mrs. McFadyen.
3. Mrs. McFadyen introduced Mrs. Farley whose talk was along the line of what is expected of the members to accomplish in their work this winter. After the talk a short prayer by Mrs. McFadyen.
4. Piano Solo by—Mrs. Avera.
5. Song—"Blest Be the Tie That Binds," after which came the social hour when they served tea and sandwiches.

The church was beautifully decorated with baskets of queen's wreath and ferns. There was an attendance of over thirty members.

BUFFET LUNCHEON.

Last Saturday evening Miss Annie Lou Baskin entertained with a lovely six o'clock dinner for the faculty of Yoe High School and the Grammar School.

Roses, Queen's Crown and Plumosa fern were used effectively to carry out the color scheme of pink and green.

There were some thirty or more teachers present, some not being able to attend owing to illness. Miss Baskin served a delicious menu from a most charmingly decorated dining table with roses and ferns and dwarf palms for center vase. She served the following menu: Fried chicken, potato flakes, bread and butter sandwiches, peas in ramkins, pineapple salad, ice tea and nut cream with angel food cake. After this delicious feast the evening was pleasantly

spent playing forty-two and merry conversation. Miss Baskin was charmingly assisted by her mother, Mrs. Arthur Baskin, and her guests are wishing for another evening in her pleasant home.

METHODIST MISSIONARY.

The ladies met at the Methodist church Monday afternoon with a good attendance. Mrs. W. O. Triggs was teacher, and at the close of the meeting, Mrs. Alex Triggs rendered a beautiful solo that was much enjoyed. Adams were joint hostesses and served Mesdames Tom Denson and P. O. ed delicious cream and cake.

A PAINFUL INJURY.

Little Miss Mildred Clinton, daughter of Mr. and Mrs. J. L. Clinton, had the misfortune to get an awkward fall while out playing with little play mates Saturday evening, which resulted in getting her left arm broken below the elbow. She received treatment at the sanitarium and we hope for her a speedy recovery.

NOTICE TO THE PUBLIC.

All hulls and meal at the Oil Mill office are CASH and I shall have to ask that no one requests us to have anything charged. I find it necessary to do this for the reason that I must pay cash for all seed purchases and I can not afford to employ collectors. Please do not say CHARGE IT.

EVANS' Corner

This corner is devoted to business, politics and general news.

By actual tests in various occupations it is a proven fact that more than sixty per cent of the people suffer with some form of defective vision. Two of the most troublesome causes are astigmatism and muscular unbalance. These two cause more headaches than all other eye trouble combined.

Defective eye sight is not confined to grown-up people. In many cases young children suffer because of weak eyes and neither they nor their parents know where the trouble lies till they have his eyes examined.

Be careful of your eyes. If you need glasses come to see us.

Texas History And The People Who Make It

CAPTURE OF GOLIAD.

A band of colonists under Captain George M. Collinsworth very quietly marched upon Goliad on the night of October 9th, 1835, and made a surprise attack that was successful. At about midnight, as they approached the town, they were hailed from the darkness by Colonel Ben Milam. He had just escaped from prison in Mexico and made his way back to Texas, and thinking Collinsworth's party were Mexicans, he hit them a thicket, but on hearing them talking English, he called out to them, and was over-joyed to find himself with old friends. He joined them and they proceeded towards the garrison. The Mexican soldiers fired only a few random shots, so complete was their surprise and without the loss of a single colonist, they took possession of the fort and supplies. Two cannon, three hundred muskets and about ten thousand dollars' worth of food and ammunition were captured, which later proved of great value to General Stephen F. Austin and his men, who were at that time at Gonzales, preparing to march upon San Antonio.

SAM HOUSTON NORMAL SCHOOL

The first session of the Sam Houston Normal Institute was opened at Huntsville, in the former Austin College building, October 10, 1879. The faculty was composed of Bernard Mallon, president; Oscar H. Cooper, Mrs. Isabelle Mallon and Mrs. A. A. Reynolds.

WILBARGER COUNTY.

Wilbarger county was organized October 10th, 1881, with Vernon as the county seat. It was created by the legislature, February 1st, 1858, out of the old municipality of Bexar, and named in memory of Josiah Wilbarger, an early pioneer, who was scalped and left for dead by the Indians at a spring about three miles from where the city of Austin now stands. He was rescued and lived for eleven years.

STEPHEN F. AUSTIN.

COMMANDER-IN-CHIEF.

Following the battle of Gonzales, overtures were made to Stephen F. Austin to leave San Felipe and come to Gonzales immediately, which he did, arriving there on the morning of the 11th of October, 1835, and that day, by a vote of the men, he was elected Commander-in-Chief of the Army of Texas. He was not a military man, making his unanimous election a very signal mark of the high esteem in which he was held and the confidence reposed in him by all Texans at that time. By courtesy and common understanding, he was given the title of General and this title was recognized by the provisional government organized a few weeks later. There were about three hundred volunteers assembled in Gonzales at this time and a regiment was formed. John H. Moore was elected Colonel, Edward Burleson, Lieutenant-Colonel, and Alexander Somervell, Major General Austin selected his staff as fol-

lows: Warren D. C. Hall, adjutant and inspector general, with David B. Mascomb as assistant; Peter W. Grayson and Wm. T. Austin, aides-de-camp; Wm. H. Jack, brigade inspector, and Wm. H. Wharton, judge-advocate. Three days later, Colonel Ben Milam arrived and was immediately put in command of a company of scouts.

A very pleasing incident occurred the first night of General Austin's stay in Gonzales. There had been an alienation of feeling between him and Wm. H. Wharton, and through the efforts of Captain Wm. J. Russell, a cordial reconciliation took place between them and an interrupted friendship cemented that lasted throughout the lives of these men.

This little force of three hundred men, with officers enough for a grand division of three thousand, took up the line of march for San Antonio, and on the 20th encamped on the Salado creek, fourteen miles from this objective point, to await reinforcements.

NOTICE IN PROBATE.

THE STATE OF TEXAS.

To the Sheriff or any Constable of Milam County—Greeting:

You are hereby commanded to cause to be published once each week for a period of ten days before the return day hereof, in a newspaper of general circulation, which has been continuously and regularly published for a period of not less than one year in said Milam county, a copy of the following notice:

THE STATE OF TEXAS.

To all persons interested in the estate of Fred Jorgensen, deceased, Mrs. Flora Strelsky has filed an application in the County Court of Milam county, on the 3rd day of October 1922, for the probate of an instru-

ment in writing filed with said application alleged to be the last will and testament of said Fred Jorgensen, deceased, and for appointment of Mrs. Flora Strelsky as independent executrix without bond of said will which said application will be heard by said court on the 4th day of December 1922 at the Court House of said County in Cameron, at which time all persons interested in said estate are required to appear and answer said application, should they desire to do so.

Herein Fail Not, but have you before said Court, on the first day of the next term thereof, this writ with your return thereon, showing how you have executed the same.

Witness my hand and official seal, at Cameron, Texas, this 3rd day of October 1922.

WILL T. YATES, Clerk,
County Court, Milam County, Texas.
By K. K. Robbins, Deputy 23 2t

SHERIFF'S SALE.

THE STATE OF TEXAS

County of Milam.

By virtue of a certain Order of Sale issued out of the Honorable District Court of Williamson county, on the 11th day of September 1922, by C. H. Gee Clerk of said Court against Lena Wells Dossett for the sum of Two Thousand Five Hundred Forty Eight and 65-100 (\$2,548.65) Dollars and costs of suit, in cause No. 9274 in said Court, styled W. F. Southern vs. Lena Wells Dossett and placed in my hands for service, I, L. L. Blaylock as Sheriff of Milam County, Texas, did on the 20th day of August 1922 levy on certain Real Estate, situated in Milam County, described as follows, to-wit:

Lots numbers 15, 16, 17, 18, 19 and 20 in block No. 34 to the City of Cameron, Milam County, Texas, as shown by the map or plat records of said City as duly recorded in Deed Records of said County.

And levied upon as the property of said Lena Wells Dossett, and on Tuesday, the 7th day of November, 1922, at the Court House door of Milam County, in the City of Cameron,

SAGE TEA TURNS GRAY HAIR DARK

It's Grandmother's recipe to bring color, lustre and youthfulness to hair when faded, streaked or gray

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients at a small cost, all ready for use. It is called Wyeth's Sage and

Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

Everybody uses "Wyeth's Sage and Sulphur Compound" now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.

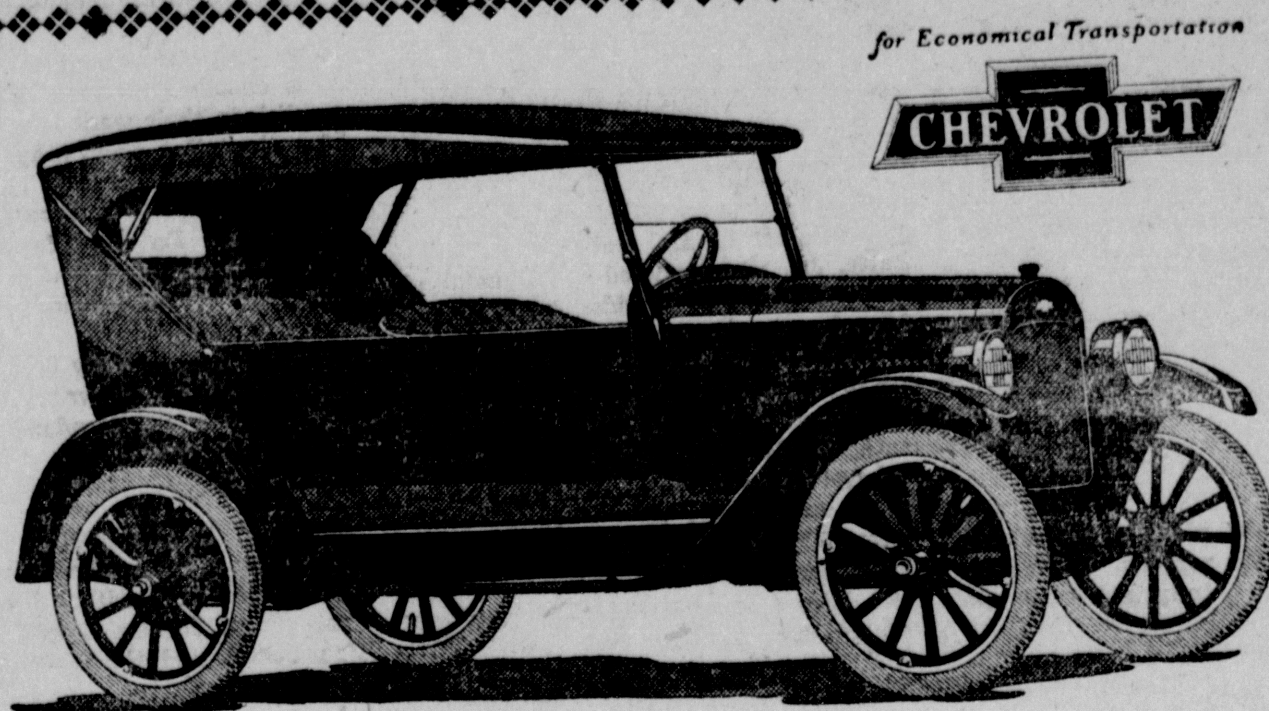

NOTICE

I have my tin and plumbing shop at my residence and I also have a phone now so when you need me for work ring me. My phone No. is 569.

P. L. MARBURGER

Witness my hand, this 20th day of September 1922.

Announcing 1923 SUPERIOR Models

Again Chevrolet Motor Company has emphasized its admitted leadership as producer of the World's Lowest Priced Quality Automobiles.

The 1923 SUPERIOR models—one of which is here illustrated—represent the most sensational values in modern, economical transportation ever established.

QUALITY has been still further improved by more artistic design and added equipment.

ECONOMY has been still further increased by engineering refinements and added facilities.

SERVICE is now offered on a flat rate basis by 10,000 dealers and service stations.

PRICES remain the same in spite of added equipment and more expensive construction, which have greatly increased value.

Some Distinctive Features

Streamline body design with high hood; vacuum feed and rear gasoline tank on all models; drum type head lamps with legal lenses. Curtains open with doors of open models. Closed models have plate glass Tarnstedt regulated windows, straight side cord tires, sun visor, windshield wiper and dash light. The Sedanette is equipped with auto trunk on rear.

Prices f. o. b. Flint, Mich.

PERSONAL INSTRUCTION

Quick, thorough preparation in those most necessary aids to business success:

Bookkeeping and Stenography

Opportunities for securing high salaried positions are practically unlimited. The State Departments at Austin need Bookkeepers and Secretaries. The United States Civil Service Commission is constantly advertising for office help. Banks and Commercial Houses are looking for well prepared young men and young women. We assist our graduates to secure positions. Write for catalog and information.

Nixon-Clay Commercial College
AUSTIN, TEXAS

AUTO RACES AND FOOT BALL AT THE 1922 COTTON PALACE

Waco, Texas.—Thrills galore will be in evidence during this year's Cotton Palace on the race track and athletic field. Several days of automobile racing, with some of the fastest dirt track drivers in the world, will compete for valuable prizes. Automobile racing has proven one of the popular out-door events at the Cotton Palace in past years, and the program this year is said to be far more thrilling than anything ever before attempted in this part of the country.

Three of the biggest football games of the year will be crowded into the Cotton Palace program. Baylor University, located at Waco, will have a busy schedule ahead, when it meets, during the period of sixteen days, Arkansas University on the first Saturday of the Cotton Palace; Mississippi College on the second Saturday, concluding with the ever popular A. & M. clash on the third and last Saturday of the Cotton Palace dates.

Without doubt, this is the most elaborate schedule of grid-iron classics ever crowded into the brief space of sixteen days.

COMMUNITY CHORUS AT TEXAS COTTON PALACE

Waco, Texas.—A series of community concerts are to be given at the Texas Cotton Palace Exposition, at Waco, each Sunday afternoon and evening, commencing on October 22. The concerts will be directed by Prof. Chas. H. Keep, for some time director of music at Baylor University.

Three concerts will be given each afternoon and three each evening, each lasting approximately one hour. There will be numbers of a nature to appeal to all who love music. The afternoon concerts will be composed of choral selections from the standard oratorios, including Handel's "Messiah" Hadyn's "Creation" and Gounod's "Gallia." There will also be opera choruses from Tannhauser, Lohengrin, and Faust. Some of Waco's favorite singers will be brought in as soloists. It is hoped that the chorus will number close to a hundred soloists. At the final concert, it is planned to sing Gaul's "Holy City," one of the most beautiful of the modern cantatas. For this performance the chorus will be increased to one hundred and fifty voices. There will also be an orchestra or from twenty to twenty-five pieces to play accompaniments at all concerts.

PRESIDENT HARDING NAMES COTTON PALACE PRINCESS

Waco, Texas.—The Texas Cotton Palace has again received recognition at the hands of the chief executive of the United States. In a letter received from the White House by President W. V. Crawford of the Cotton Palace Association, he is notified that President and Mrs. Harding have named Miss Eleanor Wheeler of Washington as princess to represent the District of Columbia at the coronation exercises and queen's ball. In a letter from Miss Wheeler she states that she gladly accepts the appointment and will be accompanied to the Cotton Palace by her mother. Last year President and Mrs. Harding designated one of the popular social favorites as District of Columbia princess, and ex-President and Mrs. Wilson did likewise before they retired from the White House.

With the naming of the District of Columbia representative, fourteen state princesses have been selected. The governors of thirteen states have chosen their princess and all have notified Cotton Palace officials of their acceptance.

The coronation exercises at the Cotton Palace, in connection with the queen's ball, have long been noted as the most brilliant social event in the Southwest, increasing in popularity from year to year. In addition to the out of state princess, duchess representing many towns and cities of Texas, have been appointed to represent Texas in this brilliant social event.

COKE PHIPPS.

HEAD STUFFED BY CATARRH? USE A HEALING CREAM

If your nostrils are clogged, your throat distressed, or your head is stuffed by nasty catarrh or a cold, apply a little pure, antiseptic, germ destroying cream into your nostrils. It penetrates through every air passage, soothing inflamed, swollen membranes and you get instant relief.

How good it feels. Your nostrils are open. Your head is clear. No more sneezing, snuffling, dryness or struggling for breath. Get a small bottle of Ely's Cream Balm from any druggist. Colds and catarrh yield like magic. Don't stay stuffed up. Relief is sure.

SULPHUR CLEARS ROUGH, RED SKIN

Face, Neck and Arms Easily Made Smooth, Says Specialist

Any breaking out of the skin, even fiery, itching eczema, can be quickly overcome by applying a little Menthosulphur, declares a noted skin specialist. Because of its germ destroying properties, this sulphur preparation begins at once to soothe irritated skin and heal eruptions such as rash, pimples and ring worm.

It seldom fails to remove the torment and disfigurement, and you do not have to wait for relief from embarrassment. Improvement quickly shows. Sufferers from skin trouble should obtain a small jar of Rowles Menthosulphur from any good druggist and use it like cold cream.

ICE CREAM AND BOX SUPPER.

There will be an ice cream and box supper at Walkers creek church Friday night October 13, 1922, for the benefit of the school. Everybody invited.

\$10 REWARD.

LOST—One black mare mule 14 hands and 3 inches high, closely roached. Shod in front and about 4 years old. \$10 reward for return of mule or information. Address J. R. Fuller, Route 2, Buckholts, Texas. 24 2tp

666

666 is a prescription for Colds, Fever and LaGrippe. It's the most speedy remedy we know.

To Stop a Cough Quick

take HAYES' HEALING HONEY, a cough medicine which stops the cough by healing the inflamed and irritated tissues.

A box of GROVE'S O-PEN-TRATE SALVE for Chest Colds, Head Colds and Croup is enclosed with every bottle of HAYES' HEALING HONEY. The salve should be rubbed on the chest and throat of children suffering from a Cold or Croup.

The healing effect of Hayes' Healing Honey inside the throat combined with the healing effect of Grove's O-Pen-Trate Salve through the pores of the skin soon stops a cough.

Both remedies are packed in one carton and the cost of the combined treatment is 35c. Just ask your druggist for HAYES' HEALING HONEY.

A business meeting of the Methodist pastors in the near by towns was held in the Methodist church on Monday last. Rev. C. T. Talley, presided. Those in attendance were: Rev. H. V. Daily of Davilla, M. J. Bigger of Buckholts, E. L. Shettles of Austin, J. C. Cockrell, Maysfield, McCoy of Tracy, D. H. Hotchkiss, Navasota and Rev. Ira F. Key.

Ouch! Lumbago Pain! Rub Backache Away

Instant Relief with a small trial bottle of old "St. Jacobs Oil."

Kidneys cause Backache? No! They have no nerves, therefore can not cause pain. Listen! Your backache is caused by lumbago, sciatica or a strain, and the quickest relief is soothing, penetrating "St. Jacobs Oil." Rub it right on your painful back, and instantly the soreness, stiffness and lameness disappears. Don't stay crippled! Get a small trial bottle of "St. Jacobs Oil" from your druggist and limber up. A moment after it is applied you'll wonder what became of the backache or lumbago pain.

Rub old, honest "St. Jacobs Oil" whenever you have sciatica, rheumatism or sprains, as it is absolutely harmless and doesn't burn the skin.

Cornell Wall Board

The primary purpose of CORNELL-WALL-BOARD is to take the place of lath, plaster, paper and canvass for walls, ceilings and partitions, but it is surprising to note that there are so many other uses for this material.

A FEW SUGGESTIONS ARE LISTED BELOW:

Attic Rooms.
Automobile Produce Carriers.
Berry Boxes.
Blackboards.
Book Cases.
Bottoms for Drawers.
Ceilings.
Chair Seats.
Clothes Closets.
Egg Cases.
Feed Bins.
Fruit Bins.

Hat Boxes.
Hen's Nest.
Kitchen Floor Mats.
Mirror Backs.
Nest Bins.
Music Cabinets.
Playhouse for Children.
Shirtwaist Boxes.
Table Mats.
Talking Machine Record Cabinets.
Wood Boxes.

These are only a few of the things Cornell-Wall-Board may be used for about the home, there are many others. To many to mention here. You will find the price of the Wall-Board economical for every use we recommend.

We carry a complete stock of Cornell-Wall-Board. A bunch of Cornell-Wall-Board about the house will convince you that we are right. Ask us about this when you are in town.

35,000 CATHOLICS

MARCH IN PARADE AT WASHINGTON.

Washington—One of the largest public religious demonstrations in the history of the country was held here yesterday, when 35,000 Catholics, headed by Archbishop Michael J. Curley of Baltimore, marched in celebration of the Golden Jubilee of the Holy Name Society.

Distinguished Catholic prelates from cities of the East attended the demonstration at the base of Washington monument. Archbishop Curley and Bishop Shehan of Catholic University addressed the huge throng in the interest of church solidarity.

Patrick J. Waltigan, president of the Baltimore union of the Holy Name Society, read a letter from President Harding commending the work of the society.

THE STATE OF TEXAS.

To the Sheriff or any Constable of Milam County—GREETING:

You are hereby commanded to summon Joe Turner by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the District Court of Milam county, to be holden at the court house thereof in Cameron, on the 13th day of November, 1922, the same being the second Monday in November, 1922, then and there to answer a petition filed in said court on the 30th day of August, 1922, in a suit, numbered on the docket of said court No. 8720, wherein Georgia Turner is plaintiff and Joe Turner is defendant said petition alleging:

Suit for divorce on the ground of cruel treatment and excesses.

Herein fail not, but have before said court on the first day of the next term thereof, with your return thereon, showing how you have executed same.

Witness, Penn Wolf, Clerk of the District Court of Milam County, Texas.

Given under my hand and the seal of said court, in Cameron, this the 10th day of October A. D. 1922.

PENN WOLF,

Clerk of the District Court, Milam Milam County, Texas. 24 4t

BAPTISTS TO START REVIVAL MEETING HERE OCTOBER 15

REV. R. C. WHITE, PASTOR, WILL
PREACH DURING TWO
WEEKS CAMPAIGN.

The Baptist church in Cameron will begin a revival meeting on Sunday October 15 with the pastor Rev. R. C. White to do the preaching.

The pastor as moderator of the association is closing the meeting at Burlington and will begin at once to prepare the church for the revival which will last two or more weeks.

L. E. Payne of Abilene first Baptist church who is a graduate in Gospel music from the Southwestern Baptist Seminary will conduct the singing.

Rev. White has been engaged throughout the summer in conducting meetings, the latest one being in Greenburg, North Carolina. His preaching will no doubt bring about a great revival in the church.

ROCKDALE BREEDERS WIN AT CAMERON STOCK SHOW.

Rockdale hog and dairy men just about cleaned up on the premium list at the livestock show held in Cameron last Friday and Saturday. There was quite a nice display of all kinds of stock, it is said, with some excellent entries in all classes.

In Jersey cattle W. E. Gaither mopped up, winning everything offered practically.

In Duroc Jersey hogs, R. C. Williams took first money on senior sow, 1st, 2nd and 3rd on junior sow, grand championship on junior sow, first on junior boar, and grand championship on junior boar.

In the Poland China hog line Scott Baldridge captured first money on senior sow, grand championship on senior sow, first on junior boar and grand champion on junior boar.—Rockdale Reporter.

THE STATE OF TEXAS.

To the Sheriff or any Constable of Milam County—GREETING:

You are hereby commanded to summon Lewis Phillips by making publication of this citation once in each week for four successive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the District Court of Milam County, to be holden at the court house thereof in Cameron, on the 13th day of November 1922, the same being the second Monday in November 1922, then and there to answer a petition filed in said court on the 7th day of September 1922, in a suit numbered on the docket of said court No. 8731, wherein Leona

PENN WOLF,

Clerk of the District Court, Milam County, Texas. 20 4t.

CALOMEL GOOD

BUT NEXT DOSE

MAY SALIVATE.

It is Mercury, Quicksilver, Shocks Liver and Attacks Your Bones.

Calomel salivation is horrible. It swells the tongue, loosens the teeth and starts rheumatism. There's no reason why a person should take sickening, salivating calomel when a few cents buys a large bottle of Dodson's Liver Tone—a perfect substitute for calomel. It is a pleasant vegetable liquid which will start your liver just as surely as calomel, but it doesn't make you sick and can not salivate.

Calomel is a dangerous drug, besides it may make you feel weak, sick and nauseated tomorrow. Don't lose a day's work. Take a spoonfull of Dodson's Liver Tone instead and you will wake up feeling great. No salts necessary. Your druggist says if you don't find Dodson's Liver Tone acts better than treacherous calomel your money is waiting for you.

LADY GOT SO WEAK COULD SCARCELY STAND

After Suffering From Many Female Troubles This Lady Heard of Cardui and Took It, She Says, "Until I Was Well"

"SOME TIME AGO," says Mrs. Buena McFarland, of R. F. D. 2, Bostic, N. C., "I suffered a great deal with weakness common to women.

I had bearing-down pains, my sides and back hurt, and my limbs drew. I would get so weak in my knees I could scarcely stand.

"I was very nervous, and could not rest. I didn't feel like eating. I grew thin, and did not have ambition for anything.

"I had been trying other remedies... but did not get any better.

"Some one told us of Cardui, and what it was recommended for. I also

took a Ladies Birthday Almanac and read of a case something like mine. I told my husband to get it and I would try it.

"I saw a great improvement after the first bottle (of Cardui), so I kept it up until I was well. Now I am the picture of health."

Thousands of other women have written, to tell of the beneficial results obtained by taking Cardui, and to recommend it to others.

Cardui has stood the test of extensive use, for more than forty years, in the treatment of troubles common to women. Try it.

Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach.

Girls and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phosphated hot water drinking and are assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

Women who desire to enhance the beauty of their complexion should just try this for a week and notice results.

Children Cry for Fletcher's

CASTORIA

The Kind You Have Always Bought, and which has been in use for over thirty years, has borne the signature of *Chas. H. Fletcher* on the wrapper all these years just to protect the coming generations. Do not be deceived. All Counterfeits, Imitations and "Just-as-good" are but Experiments that trifle with and endanger the health of Infants and Children—Experience against Experiment.

Never attempt to relieve your baby with a remedy that you would use for yourself.

What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

The Kind You Have Always Bought

THE CENTAUR COMPANY, NEW YORK CITY.

The Studebaker Light-Six Roadster and Coupe-Roadster were primarily built for business use. In meeting the urgent demands of business, they naturally have fulfilled the needs of the small family.

Each is built for hard usage, day in and day out. And as they are completely Studebaker built—you know they will stand up under hard going.

The bodies are attractive, roomy and thoroughly comfortable for all-day travel. Ample

luggage space is provided under the rear decks.

There's an internal hot-spot to reduce gasoline consumption to a minimum. Valves are inclined at a 20 degree angle to give a new measure of power, greater flexibility and better acceleration. Crank shaft and connecting rods are machined on all surfaces, thus eliminating vibration and insuring longer life to the motor.

Studebaker low prices are made possible by great volume and complete manufacture. Studebaker quality is traditional.

The Studebaker Light-Six Coupe-Roadster seats two passengers; has side coach lamps; rain visor and windshield wiper; eight-day clock.

The three-passenger Roadster has cowl lights; storm curtains opening with the doors; large plate-glass window in rear curtain, and inside and outside door handles.

Both models are upholstered in genuine leather; have ample space under the rear deck for luggage; ignition and thief-proof transmission locks, and cowl ventilator.

Miss Florence Hacker is attending the Dallas Fair this week.

Mrs. J. H. Eastland of Mineral Wells, is visiting her mother, Mrs. Wm. Jeter. Mrs. Eastland will be remembered as Miss Alpha Jeter, and has many warm friends who are glad to welcome her to our city once again.

Mr. and Mrs. Willard Chambers who recently moved from here to Bryan are guests of relatives this week.

We want your seed cotton and cotton seed R. L. Batte. 23-2t

Mrs. W. A. Gillon and son, Robt., are leaving this week for Dallas where they will make their future home. Mrs. Gillon has built a handsome seven room bungalow out near Southern Methodist University, one of the most attractive additions to Dallas, and Miss Louise, her youngest daughter, who is connected with S. M. U. will join her upon her arrival and they will form a happy little family, and later Miss Grace will join them. Mrs. Gillon has been long identified with the social, church and civic activities of Cameron and will be missed by her many friends. There will always be a hearty welcome for her return to our town.

Mr. and Mrs. Leo. Wilkerson and daughter left Tuesday for the Dallas Fair.

New shipment of stamped goods just received at the Ever-Ready Electric Company.

Don't forget that Saturday, Oct. 14th is National Candy Day, when everyone is expected to buy a box of candy for their friends and best girls. We are featuring for this occasion Sowards, Loose-Wiles and Jacobs Candy Co.—all first-class goods; none better. We also have the famous Crystal Cactus Candies made from cactus plants. Claimed that you can eat all you wish and will not make you fat. Don't forget the date.

TUCKER & TYSON.

ICE CREAM AND BOX SUPPER.

There will be an ice cream and box supper at Walkers creek church Friday night October 13, 1922, for the benefit of the school. Everybody invited.

Hemstitching and dressmaking Mrs. Allie Kinard, Moore building Cameron, Texas. 4tf

Mrs. Criner, of Dallas is a house guest in the home of her daughter, Mrs. John Mangum.

Joe J. Parma is in Dallas this week attending the State fair.

Tarantula Bite Not Fatal.

Von Fuerth considers that the bite of the historically famous Italian tarantula is able to cause no more than local inflammation, while the toxicologist Kobert was unable to discover profoundly poisonous properties in the supposedly more dangerous Russian tarantula, Eurytelma steindachneri, a species reaching the formidable looking adult size of more than two inches in length. It has been exonerated from the reputation long attaching to it.

Baerg of the University of Arkansas has subjected both animals and man to attack by the fangs of active tarantulas. Although the accounts do not give the impression that such encounters are painless performances, they are put in the category of bee stings in severity rather than in a class of more menacing toxins. Even bees may produce fatalities; yet they are rarely classed among the greater dangers to life.—Journal of American Medicine.

Finest Road in World.

The finest road system in the world is to be given in France. It was inaugurated by Napoleon.

Maintained Monopoly by Murder.

The glass-makers of Venice used to guard their secrets by murdering all renegades who tried to escape to other countries with their trade-skill and thereby threaten the monopoly of Venice. Emissaries used to be sent by the state to assassinate workmen who took the glass-craft abroad. Two men from Murano the little island at Venice, where glass makers still live, were induced by the Emperor Leopold of Belgium to migrate to his dominions, but they were killed by order of the Council of Ten.

Any artisan caught attempting to go to foreign parts was sent to the galleys. A state policy of preventing unemployment was given as excuse for the murderous policies by the Venetian government. It was claimed that workmen had been thrown out of work for two and a half months by spread of glass factories in Spain.

Qualified.

Negro Rookie—Id' luhk ta have a new pair o' shoes, sub.

Sergeant—Are your shoes worn out? Rookie—Worn out! Mán, the bottoms of mah shoes are so thin Ah can step on a dime and tell whether it's heads or tails!—Arkansas Thomas Cat

A business meeting of the Methodist pastors in the near by towns was held in the Methodist church on Monday last. Rev. C. T. Talley, presided. Those in attendance were: Rev. H. V. Daily of Davilla, M. J. Bigger of Buckholts, E. L. Shettles of Austin, J. C. Cockrell, Maysfield, McCoy of Tracy, D. H. Hotchkiss, Navasota and Rev. Ira F. Key.

Take Salts to Flush Kidneys

Eat less meat if you feel Back-achy or have Bladder trouble.

Too much meat may form uric acid, which excites and overworks the kidneys in their efforts to filter it from the system. Big meat eaters can flush the kidneys occasionally to relieve them like they relieve the bowels, removing all the acids, waste and poison, else they may feel a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, the stomach sour, tongue is coated, and when the weather is bad they have rheumatic twinges. The urine is cloudy, full of sediment; the channels often get irritated, obliging one to get up two or three times during the night.

To help neutralize these irritating acids and flush off the body's urinous waste get about four ounces of Jad Salts from any pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine and bladder disorders disappear. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to help clean and stimulate sluggish kidneys and stop bladder irritation. Jad Salts is inexpensive, harmless and makes a delightful effervescent lithia water drink which millions of men and women take now and then to help prevent serious kidney and bladder disorders.

CANDY DAY

Saturday October 14th in National Candy Day. Every mother should be remembered on this day with a box of nice Candy. Every sweetheart and sister likewise should be remembered also.

We have the best fresh chocolates.

REVIVAL MEETING

First Baptist Church

Pastor, Russell C. White

SUNDAY OCT. 15 to 29

Preaching by the Pastor

We Extend to all a Hearty Welcome

First Baptist Church

GREAT WORK IS DONE BY CLUB AS SHOWN BY COMMITTEE REPORTS

Roll call showed the following present:

Officers—Robt. McLane, president; W. W. Chambers, vice president; W. B. Skelton, secretary.

Directors—J. W. Coleman, W. O. Triggs, O. M. Smith, Dr. Jas. Watson, John E. Mangum, Geo. T. Graves, C. W. Lawrence, H. M. Hefley, C. R. Phillips, R. H. McIntosh.

Committee Chairmen—Edwin York, S. P. Cross, Dan Tyson, C. W. Bradbury, W. M. Cobb, W. G. Gillis.

Minutes of previous meeting were read and upon motion adopted.

A letter was read from the president of the Texas Cotton Palace Exposition offering to designate one day of the Waco Cotton Palace as "Cameron" day and to co-operate in any way possible in making this day a beneficial one for Cameron. On motion from C. W. Lawrence, duly seconded the letter was referred to the Publicity Committee.

Written reports were then read from the Treasurer, Secretary and the following standing committees: Civic Improvement, Publicity, Agriculture, Membership and Entertainment. These reports are attached hereto as exhibit "A" of the minutes and are made a part thereof. In addition to the written reports W. G. Gillis, chairman of the Investigating committee reported orally that only one matter had been referred to his committee, that of investigating the advisability of paying on oil paper several hundred dollars per month to operate their paper in Cameron and advertise the town and that this proposition was turned down by the committee. On motion from W. W. Chambers, seconded by J. W. Coleman the above reports were duly received by the club.

Next on the program was the election of officers. The following names were put in nomination for president: C. W. Lawrence, O. L. Kidd, W. G. Gillis, Giles L. Avriett, John E. Mangum, and W. W. Chambers. Every one seemed to want the other fellow to have the job and upon motion from W. W. Chambers duly seconded C. W. Lawrence was elected president by acclamation.

H. M. Hefley, R. H. McIntosh and W. M. Cobb were put in nomination for Vice President. Upon motion from Geo. T. Graves, duly seconded Mr. McIntosh was elected by acclamation.

Irvin N. Cleary was nominated for Treasurer by Geo. T. Graves and he was elected by acclamation.

The regular order of business was resumed and G. C. White was elected to membership in the club.

The result of the election of Directors was then announced and the following declared elected: J. W. Coleman, J. T. Parma, Robert McLane, J. C. Martin, W. G. Gillis, W. M. Cobb, C. R. Phillips, Hubert Hefley, W. O. Triggs, O. M. Smith, C. W. Bradbury, Geo. T. Graves.

Mr. McLane then turned the chair over to Mr. Lawrence, the new president, who made a short talk, expressing appreciation of the honor conferred upon him but stating that he had rather be called chairman than President. He also stressed the importance of committee work and stated that he was not going to play any favorites in the appointment of committee chairmen. He accepted the office to which he was elected and promised to do the best he could by it.

J. W. Coleman suggested that a lot of new members could be secured by the putting on of a membership campaign.

The shortage of houses both business and residence was discussed by C. R. Phillips, J. D. Dobbins and R. P. Jeter but no solution was offered for immediate relief.

MEMBERSHIP COMMITTEE.

To the President and Directors, Cameron Commercial Club:

Gentlemen:

We the membership and entertain-

ment committee, beg to report as follows, we have received into the Club two new members and eight have withdrawn during the past six months.

Respectfully submitted,
S. A. COTTLE, Chairman.
C. W. BRADBURY,
H. H. STEDMAN.

TREASURERS REPORT.

To the President and Members, Cameron Commercial Club:

As treasurer of the club I beg to report as follows:

Received from Secretary at first of term.....\$171.08

W. B. SKELTON, Sec'y.

CIVIC IMPROVEMENT COMMITTEE REPORT.

To the Officers and Directors of the Cameron Commercial Club:
Gentlemen:

We, your civic improvement committee, beg to hand you herewith a report covering the activities of the committee for the past term of six months. During this time we have worked in conjunction with the City

Council, which has been very friendly to the Club and which has always been willing to co-operate in every way possible with the committee.

The principal achievement of the committee during this term has been the opening up and improving of the property now known as the Wilson-Ledbetter Park; this work having been accomplished through the City

J. T. Parma

Diamond Tire Distributor.

Milam—The County of Diamonds—not stones—But Tires.

The truck, tractor or passenger car with a "tube and fin" type radiator can have it repaired PERFECTLY HERE.

Besides being repaired right mechanically (watertight and without reducing radiation surface) it will LOOK RIGHT too. All other types repaired also.

Milam County Hardware Co.

Cameron, Texas.

JUST PAY UP PROMPTLY

All the merchants of Cameron ask of you is that you pay promptly for the goods you purchase. Goods purchased in September should be paid for RIGHT NOW—and, under no circumstances, later than the 15th.

If Mrs. Frank Townely Brown or Mrs. William Smith Jones buys merchandise on credit and fails to pay for same by the tenth of the month following date of purchase, these worthy ladies will find that the Cameron Retail Credit Men's Association has placed their names on the credit book with the notation following—SLOW PAY.

Once the "Slow Pay" mark goes against a name it will be found extremely difficult to obtain further credit at any store in town. For the reason that these credit records are open to all credit men—consequently they know at all times just how YOU are paying your bills.

If you owe money for goods bought last month—PAY IT NOW AND KEEP YOUR CREDIT GOOD.

COMMITTEE REPORTS.

(Continued from page one.)

Council. The most important thing done toward improving this property was the buying of the adjacent land which was used for slaughtering purposes, and the clearing away of the debris thereon. There has been constructed through the Park, a roadway leading from the main entrance through the Park to the sub-entrance. Two large gates, one at each entrance, have been erected a cording to the deed to the land which was given the city by the late Mrs. Lizzie Wilson. During this motoring season, there have been hundreds of tourists who have stopped over days and nights in the park, and has proved to be a boost for the City because of its accommodation to these travelers. This Park is now being used for the Milam County Fair, which is now in progress. There are a few recommendations which we wish to offer later, concerning the further improvement of this property.

Another matter which is worthy of mention is the improvement of the small City Park, located in the heart of the town. During the past few months, there has been installed, several hundred dollars worth of swings, merry go-rounds, etc., for the children which now makes it an up-to-date play ground, as good as any to be found in towns much larger than Cameron.

The recommendations concerning the Wilson-Ledbetter Park which we wish to offer, may be taken for what they may be worth to our successors. Owing to the lack of funds the City will be unable to improve this property at this time, as we hope some day to see it. We suggest however, that permanent plans be drawn up of the pro-

posed improvements, and when money is available for this purpose, that it be expended along permanent lines, and not for things temporarily and of short life.

We would suggest further, that great care be taken in the clearing up of the property, so that there will not be timber cut, that later might be of great value toward further beautifying the Park. We also suggest that more accommodations for motorists be installed as time passes, so that we will ultimately have the best and most beautiful City Park in Texas.

Respectfully submitted,
E. YORK, Chairman,
J. E. MANGUM,
J. T. PARMA.

COMMITTEE ON AGRICULTURE.

Robert McLane, President, Cameron Commercial Club:

Dear Sir:

Your committee on Agriculture begs leave to report as follows:

This committee investigated the need of a negro Demonstration Agent for Milam County, and deciding that there was work for such a man among the negro farmers of the county, and that the county could get services of a competent man for \$300 a year, the State paying the balance of his salary, recommended that one be employed and the Commissioner's Court made the necessary appropriation and a man has been employed. We have seen and talked with him and he appears to be competent and we believe he will do some good in this position.

This committee also put over the Annual Live Stock and Poultry Show last Friday and Saturday. There was the largest crowd in Cameron on these days that has been known for years. The show was thoroughly advertised and the attendance was gratifying. The Livestock display was the best ever seen in Milam county and the poultry exhibit was fine, considering

the time of year, which was very unfavorable, owing to the fact that all chickens are now in some stage of moulting. Besides the prizes offered were inadequate. In spite of all this, the show was good. The agricultural display was good but not large and the Ladies Department was interesting and under more favorable conditions would have been large. The Health exhibit made by the school children under direction of Miss Carter, the County Red Cross Nurse, attracted much favorable attention. The Cameron Concert Band was a big help, giving concerts morning and afternoon of each day. Mr. Medsker, the director, deserves thanks for the interest he took in making the Fair a success. The Committee also wishes to thank Geo. Banzhaf, County Demonstration Agent for his invaluable services. We could not have gotten along without him. Mr. Geo. T. Graves who had charge of the Live Stock exhibit, E. L. Griffith who looked after the Poultry section, and J. E. Mangum, who was chairman of the Finance Committee, did splendid work. The outstanding difference between Mr. Mangum and some of the other committeemen was that he said he would not work and did work, while others said they would work and did not. Mr. Coleman, Mr. Hefley and the other members of the Finance Committee also worked faithfully.

The parade Friday morning was a feature of the show that would have been immense, if it had not been for the Dengue fever. Nearly every business man in town promised to decorate a car, but they all got short-handed and about ninety per cent came up delinquent. However we did have a good parade and J. B. Lindsey, who had charge of it, deserves thanks for his good work.

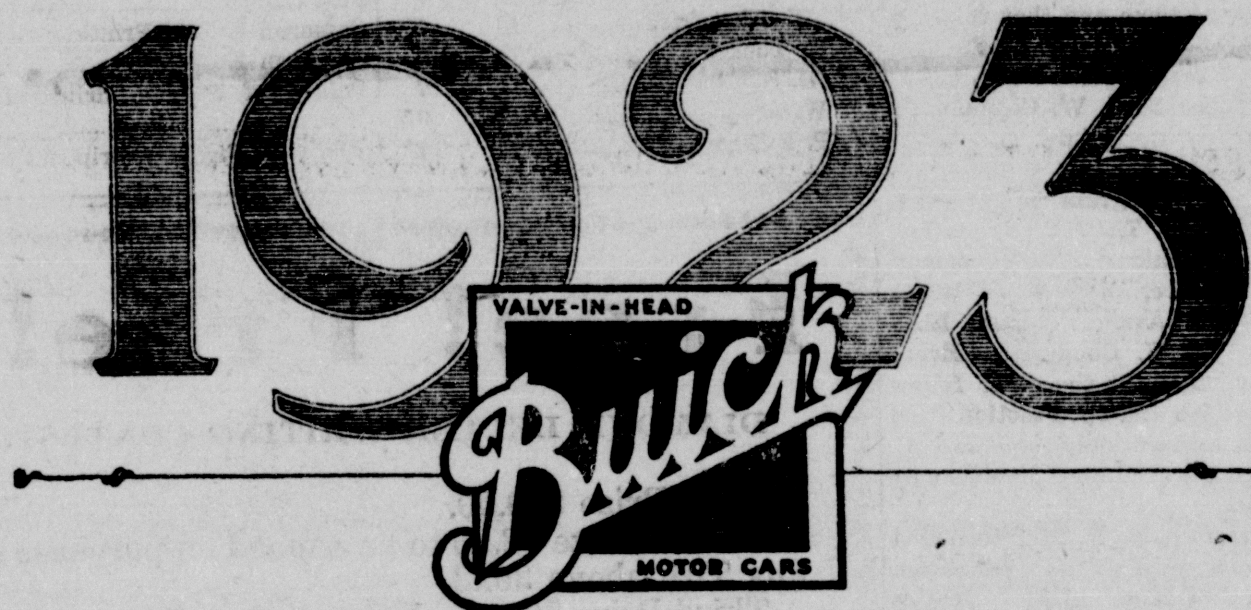

In our opinion, the Fair this year, showed beyond question that Cameron

ought to have a fairground, with half-mile track, all necessary buildings and facilities necessary to put on a real Fair. A Fair Association should be formed with a capital of Ten Thousand

dollars, to buy grounds and have a real fair. If the people will come to Cameron by the thousands to see a stock and poultry show, they would come by (Continued on page 3.)

Some of The Improvements and Special Features on Buick Four-Cylinder Cars for 1923.

FOUR-CYLINDER OPEN AND CLOSED MODELS.

Insurance rating on all models materially reduced.
Redesigned bodies and tops.
Higher radiator with raised filler cap.
Higher straight hood line.
Longer cowl.
Lower top.
Kick-up type frame which lowers rear of body.
Easier riding springs.
Lower body level on all models.
Heavy one-piece crowned fenders.
Transmission speedometer drive.
Transmission lock.
Drum type headlights.
Drum type parking lights.
Longer transmission control lever.
New type hood catches.
Heavier windshield brackets.
New windshield with adjusting wing nuts on inside.
Rubber grommet between windshield post and cowl on open models.
Wide rounded rear top bow on open models.
Rubber bumpers on rear axle.
Oil holes with sliding covers in rocker arm dust cover for convenience in oiling.

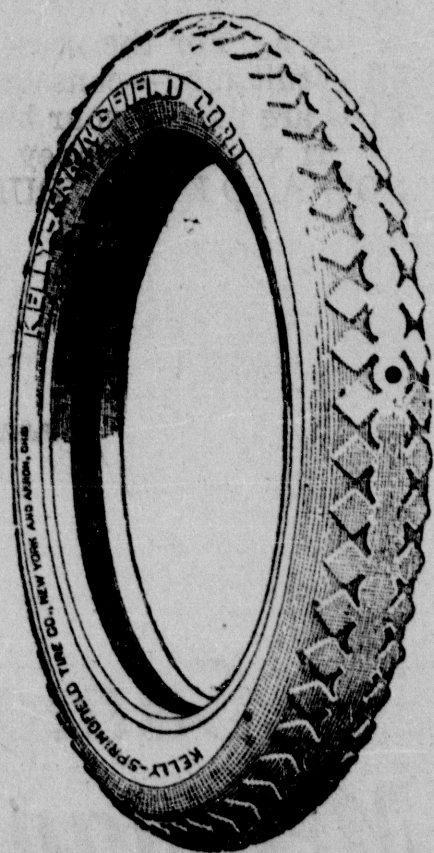

Silent over-running generator clutch Switch with glass face.
Special switch button for cowl light.
Rear fender wings cover end of gas tank, no openings.
Valve stem lubricating felts.
Heavier front pillar brace irons.
Heavier front tonneau brace irons.
Heavier cross members to body sills.
More body attaching bolts.
Heavier windshield brackets.
Metal bumper plates on doors to prevent wear of rubber bumpers.
Heavier door locks.
Position of seats changed, more room and comfort.
Longer steering gear with lower position.
Generator brushes and arms improved.
Generator bearing oilers more accessible.
Drop forge clutch hub.
Closer fitting clutch plates.
Heavier heat-treated strut rods.
Heavier heat treated truss rods.
Longer wearing brake lining.
Front seat back extended to floor.

"It Costs No More to Buy a Kelly"

For years the best buy for small or large automobiles.

A chat with a user of Kelly Tires will convince you that they are the best. Satisfaction comes with the best service, that is why we are so certain that our customers are satisfied.

You too may have this service by buying a Kelley-Springfield Tire and Tubes.

WHEN BETTER AUTOMOBILES ARE BUILT, BUICK WILL BUILD THEM

MILAM COUNTY EXCITEMENT IS AT HIGHEST.

The Milam County fields are at fever heat this week and hundreds of oil operators from all parts of the country are visiting this territory, most of them securing protection around the Posey well.

Much interest and attention is being paid to the well of the Guiberson people, the No. 1, Posey, six miles southeast of Cameron, on Cannon Snapp Creek. This well is drilling around the 2,650-foot level in the Austin chalk. The drilling crews are working night and day and, according to the reports current here, the well will be drilled rapidly. It is the consensus of opinion that a sand will be found around the 3,200-foot stratum.

Hamil Brothers, the drilling contractors, and the geologist, W. H. Foster, who made the location, have been on the ground the last 10 days.

Several good acreage deals have been made this week and acreage in the three-mile limit is selling for \$10 to \$15 per acre.

The U. S. Tex Oil Corporation has finished getting up the block of acreage in the vicinity of Branchville, six miles northeast of the Guiberson well. A deep test well will be drilled there as soon as machinery can be moved on.

The Lee Oil Company No. 2 Neihous, which is a 1,600-foot test, has drilled in one of the best wells that has been discovered in the shallow field. The well is said to be good for from 50 to 75 barrels at 715 feet.

The daily production of the shallow pool is growing by leaps and bounds and is now around 400 barrels daily. All the oil is being taken by the Owens Refining Company, maintaining a 1,500-barrel refinery and pipe line in the Milam County field.

THE STATE OF TEXAS.

To the Sheriff or any Constable of Milam County—GREETING.

You are hereby commanded to summon Amos Beal by making publication of this citation once in each week for four successive weeks previous to the return day hereof, in some newspaper published in your county, to appear at the next regular term of the District Court of Milam county, to be holden at the court house thereof in Cameron, on the 13th day of November 1922, the same being the second Monday in November 1922, then and there to answer a petition filed in said court on the 7th day of October 1922, in a suit, numbered on the docket of said court No. _____ wherein Millie Beal is plaintiff and Thos Beal, is defendant, said petition alleging:

Statutory grounds of three years abandonment.

Herein fail not, but have before said court on the said first day of the next term thereof, with your return thereon, showing how you have executed the same.

Witness, Penn Wolf, Clerk of the District Court of Milam county, Texas.

Given under my hand and the seal

of said court in Cameron, this 7th day of October A. D. 1922.

PENN WOLF,
Clerk of the District Court, Milam County, Texas. 24 4t.

FUNDS ARE NEEDED—STUDENTS AID WORK.

The several articles which have recently been published in regard to the work of the Texas Student Aid Association have brought scores of appeals for aid. So many have these calls been that the present available funds of the association are exhausted. This appeal is being made for contributions that a fund may be ready for other students by December 1.

Houston, Beaumont and other cities have liberal contributions; Bee and other counties are being organized for work for student aid funds.

Every one who reads this article is urged:

To look after some boy or girl in the community who needs assistance to be able to attend grade or high school, college or vocational school; or

To send the amount to be contributed to Mrs. A. C. Buchanan, treasurer of the Texas Student Aid Association, Temple, Texas, noting the school for which the loan is to be used.

Habitual Constipation Cured in 14 to 21 Days

the tens of thousands to see a real Fair.

Respectfully submitted,
W. M. COBB, Chairman.

PUBLICITY COMMITTEE.

To the Officers, Directors and Members of the Cameron Commercial Club:

Gentlemen:

At the last semi-annual meeting of the club some six months ago, the publicity committee made the report of the splendid advertising that had been given Cameron through the medium of articles sent out through the state press and local papers. I am proud to state that through the same channel of advertising we have made more progress by covering a large field and by adding more papers and periodicals than heretofore.

Publicity has been given Cameron through all of the State papers and oil journals. Articles have appeared in all of the State dailies, both Sunday and week days. These articles covered almost everything of interest that would serve to boost and advertise Cameron—boosting the numerous resources and possibilities that are today knocking at our door. We had a full page picture section and an article descriptive of the city and vicinity in the Sunday Dallas News on June 18th. Numerous photographs have appeared in all of the state papers of the oil fields together with oil items of the development of our oil resources that has grown by leaps and bounds as a result of the constant hammering on

the rock of publicity.

During the baseball season daily reports were sent out by wire to five of the leading state papers and through the courtesy of the Waco News-Tribune feature stories were carried on the splendid ball club and Cameron thereby came to be known to the four corners of the State.

Many of the large oil concerns have been attracted here and operators from over the state and country generally have entered the field through the efforts of your publicity committee.

Cameron, in fact old Milam is beginning to become known all over the country and I believe that we are getting more free advertising through the various papers than any other

city or county of the same size.

Through the co-operation of secretary, Mr. Skelton, G. L. Avriett, J. B. White, Wm. Cobb, J. R. Hayes, Mrs. Plaster much help has been given your committee in this work and also through the different representatives of the newspapers, both state and local.

Respectfully submitted,
DAN TYSON, Chairman.

No Worms in a Healthy Child

All children troubled with Worms have an unhealthy color, which indicates poor blood, and as a rule, there is more or less stomach disturbance. GROVE'S TASTELESS CHILL TONIC given regularly for two or three weeks will enrich the blood, improve the digestion, and act as a General Strengthening agent to the whole system. Nature will then get rid of the worms, and the child will be healthy and happy.

NOTICE.

This is to give notice to the public that cotton receipt No. 42708, issued in the name of Huffman & Mackey on the 29th day of September, 1922, by the Cameron Compress Company, for One Bale of Cotton delivered by them to that Company, has been lost, and that the undersigned is the legal owner and holder of said cotton, and the public is warned not to accept said receipt or to deal with same in the hands of any other person.

The Pernicious Teachings Of the K's

Will someone tell me---WHY the K's antagonize the Jews, the Catholics, the Negroes, the Mexicans, and all foreigners and organized labor, and every other person who does not belong to them or sympathize with them. I also want to ask the question---

Who Is William Joseph Simmons?

What super-natural power did he have to traverse the realm of the unknown and wrest the solemn secret from the grasp of night and become the imperial master of the great lost mystery? Why the timely words of wisdom from the soul of the great Imperial Wizard who out of darkness brings light?

Who is Emperor William Joseph that he should assume in this land of freedom so much authority? This country is not Russia, it is America and America will not stand for such a thing. It is pure "Tommy Rot." I know Jews whose parentage in this country dates back hundreds of years. The same can be said of Catholics, Germans, Bohemians, Swedes, negroes, Mexicans and many other foreigners. The United States of America has been called the "melting pot"—and is the melting pot of the whole world where foreigners are assured of freedom in religion and politics.

Our constitutional government has welcomed and accepted the foreigners who are now in this country. Every one of them came here on strictly bonafide terms and are citizens when they take out their naturalization papers and swear allegiance to the United States of America. Every person now living in the United States is a foreigner or was at some time, except the American Indian. The only original American is the American Indian and he has been pushed back and whipped by the white faces till he is now almost extinct.

An organizer for the K's came to Thorndale once and I was induced to go to the meeting against my will. The said organizer arose and told of all the people who they were opposed to—and also told in a boasting manner of some tar and feather parties they had pulled. There were 25 to 30 persons present and all of them will remember it. I happened to be on the front seat

and he passed his roster to me for my signature, I shook my head, meaning to say NO. He asked: "Don't you want to join?" I again shook my head in the negative. He then asked: "Don't you like it?" And I again shook my head in the negative. The organizer then said: "Now Brother Newton don't feel at all embarrassed, just get up and tell us why you don't want to join." I then arose to my feet and said in part: "My dear sir, I am not at all embarrassed, I was born and have been reared in this county, as was my mother before me, therefore I have no fear as to my claim to be 100 per cent American."

"The first reason I advance for not wanting to belong to your order is that you are an organized mob and mob violence is against the law, and its grossly inconsistent to say or think you can enforce the law by violating it. Next is you are antagonistic to Jews, Catholics, all foreigners, organized labor, etc."

I told him that I had been living with these people all my life and that they were my friends and that I wanted to live with them in peace and harmony rather than stir up any friction and that they were just as good citizens as he or I, and took my seat. He then said: "WELL THAT ELIMINATES YOU." I said, "YES SIR" and walked out. Pretty soon the whole crowd walked out.

We have a few of the K's here but they belong in Taylor, Rockdale and Cameron. There is no K. K. K. organization here so far as I know. Thorndale is not a K. K. town—come to Thorndale. And when you come to Thorndale come to this store. It is not a K. K. store and does not stand for its vicious principles, and does not employ K. K. Klerks.

GUS NEWTON,
President Thorndale Mercantile Company.

MINERAL RESOURCES OF TEXAS.

(Continued from Page 2.)

in Coleman county. Doubtless sand of a quality suitable for glass-making occurs at a number of localities.

In some parts of Texas gravel is notably abundant. This is true in particular of many counties at and near the inner margin of the Gulf Coastal Plains, where the gravel has been brought down by streams from the higher lands. Other areas in the state, however, are lacking in gravel, notably some of the counties in Southeast Texas.

Gravel is of great value in road-making and as a constituent in concrete. The value of sand and gravel produced in Texas in 1918, of which record was obtained, is given by the United States Geological Survey as \$519,446.

Material for Mortar and Concrete.

The materials for mortar and concrete include sand, gravel and hard rock of all kinds, the latter being used after crushing. The sands most frequently used for mortar are siliceous, although calcareous sands serve the same purpose. Gravel suitable for concrete material is notably abundant over the greater part of Texas, the rivers flowing from the higher lands having accumulated inexhaustible gravel beds. The hard rocks, chiefly limestone suitable for use in concrete after crushing, are very widely distributed throughout the state. In addition to limestone, other hard rocks, such as the granites, may be used for this purpose. Flint rock is also used to some extent.

Flint is chemically an oxide of silica, with more or less accompanying impurities. It is a variety of the mineral quartz, occurring massive and non-crystallized or more accurately, very imperfectly crystallized (cryptocrystalline). The term chert is often used interchangeably with flint. Properly chert is an impure flint or flinty rock. Flint and chert are lacking in cleavage. They break, as do the other varieties of quartz, with conchoidal fracture. A flint rock when crushed breaks into sharp cornered pieces of varying size.

In one of our Cretaceous formations, namely, the Edwards limestone, flint occurs in great abundance, and gravel and conglomerate deposits accumulated from this formation are found to contain a high percentage of flint rock. The flint in this formation occurs in irregular masses or is distributed through the limestone in more or less definite layers. The flint was presumably not present in the limestone as originally formed, but has been subsequently accumulated, representing the alteration from limestone to flint.

Water in its round of circulation through surface and deeper formations, takes silica as well as other substances into solution. In the course of its circulation through the limestone the silica in solution in the water replaces the calcium carbonate of the limestone. The direct evidence that the flint masses are formed by the replacement process is to be had from the examination of a piece of flint. In some of these flints it will be seen that the shells which were originally calcareous, have been changed to silica. The replacement process is by no means confined to the formation of flints. Chemical changes are constantly going on among the minerals making up the rock formations, and replacement of one mineral by another is one of the important phases of chemical change. The compact and partly crystallized limestones which occur locally are probably due to a somewhat similar process. The change in the case of the limestone involves a rearrangement of the constituent molecules, resulting in a harder and more compact rock.

Sand-Lime Brick.

The materials used in the manufacture of sand-lime brick is due to the chemical reaction between these ingredients. The chemical

(Continued on Page 7.)

-:- A Little Fun

JOKES TO MAKE YOU LAUGH

A PRECAUTIONARY MEASURE.

A speeding motorist was haled before a local justice, who imposed a fine of \$15. The culprit drew a roll of bills and peeled off three tens.
"Here," the justice called after the departing man, "there's \$30 here!"
"I know it," said the released motorist. "I am going out of this town faster than I came in."

LITTLE BROTHER WON.

"Robert, where is your little brother?"
"He's hurted."
"You should say 'hurt'." "How did it happen?"
"Me and him was seein' who could lean out of the window the farthest, and he won."

A POOR CHOICE.

Two colored men were discussing the relative danger to themselves of a collision or an explosion.
"Whut would yo' rudder be in—a colishun or an exploshun?" asked one darkey of another.
The other darkey thought a while and then answered:
"I'se radder be in a colishun, for in a colishun dar yo' is; but in a exploshun, dar yo' ain't."

HER DRESS WAS NOT SUITABLE.

It was the first vaudeville performance the old colored woman had ever seen, and she was particularly excited over the marvelous feats of the magician. But when he covered a newspaper with heavy flannel cloth and read the print through it, she grew a little nervous. He then doubled the cloth and again read the letters accurately.
This was more than she could stand, and rising in her seat, she said: "I'm goin' home. Dis ain't de place for a lady in a thin calico dress."

Whatever else may happen, Now our country has gone dry, The sailor will still have his port, The farmer have his rye; The cotton still will have its gin, The seacoast still its bar, And each of us will have a bier, No matter who we are.

—Trade News.

KNEADS DOUGH.

Recently there appeared in the personal column of a western paper the following item:
"Mrs. Smith, a prominent newly-wed, kneaded bread with her gloves on."
An editor of a country newspaper in an adjoining county copied the notice and remarked that he hardly thought the item worthy of mention, the editor of this paper, meaning himself, needed bread with his shoes on, and he even needed bread with his shirt on. But if some of his delinquents didn't pay up soon, he'd be needing bread without a d— thing on.

THE FARMER'S LOT.

President J. H. Kimble of the Farmers' National Congress said the other day:
"The farmer can't help envying the union man with his short hours and high wages."
"A union man, while striking for a 34-hour week, visited his cousin, a farmer in the country."
"The striking man said one day over his pumpkin-pie at dinner:
"Well, there's one thing you farmers can be thankful for anyhow, George. The death rate is smaller in the country than in the towns."
"Yes," said Farmer George; "folks that have to run a farm don't git no time to die."

AUTO HINTS

The first time a motor vehicle was used to collect mail in the United States was in Buffalo, in the early summer of 1899.

Only 9 per cent of the motor vehicles in the United States are found in the 10 largest cities, and 55 per cent are in towns of 5,000 or less.

Proper and regular lubrication of your automobile will double its serviceability and prolong its life. A good locomotive lasts 40 years when it is carefully and continually lubricated. The average automobile lasts but four because its mechanism is neglected.

Never overload underinflated tires. The average size tire, properly inflated and carrying a normal load, reaches a temperature of 140 degrees Fahrenheit just under the tread when run at 20 miles an hour speed. At 25 miles an hour the temperature is raised to 155 degrees.

Many owners do not appreciate the importance of washing their cars. Mud should never be permitted to remain on a car any longer than necessary. Practically all mud contains alkali, and in some parts of the country it is almost clear alkali. Alkali will eat through the varnish and paint and expose the body metal to rust. Excessive use of soap should be guarded against. Water should be used freely but not with too much force, and washing of the hood, if it is heated, should be left until last. Attention to small details adds much to the life of a car and increases the pleasure and comfort to be derived from motoring.

Pat (with two companions fearing that their boat would swamp during a storm)—"Can you pray?"
Companions (together)—"No."
Pat—"Can you sing?"
"No."
"Thin Oi'll pass around the hat, for we must do something religious."

ONE BETTER.

On an European battle field in the late world war a big, raw-boned Yankee sergeant was gathering in a bunch of German prisoners, among them an officer. There was a look of bewilderment on the German officer's face.
"I cannot understand it," said he. "These were the kaiser's storm troops."
"Storm troops, hell," retorted his captor. "We're from Kansas, where they is cyclones."

READY TO WORK.

Two pilgrims of the dusty road were discussing the alleged corrupt practices of modern politicians.
"Bill," said one, "you don't hanker after a gov'ment job, do you?"
"I don't mind sayin' I'd take one if I could get it," retorted the other, "but I ain't after no job that's all fat. I'm willin' to earn my wages."
"What sort of a job would be your idea?"
"Well, I'd like to fill fountain pens for some assistant secretary of the treasury."

Willie—Mother, is the pen mightier than the sword?

Mother—Of course it is. Your father couldn't sign checks with a sword.

WHADDYAMEAN, HARD LUCK?

The colonel had heard of two recent disasters in the family of his colored orderly and was surprised to find him apparently as cheerful as ever when he returned to duty after a brief furlough home.
"Well, Sam," said the colonel sympathetically, "I hear you have had some hard luck."
"What, me, suh? Nossuh, I'se ain't had no hard luck."
"Why, wasn't that your brother who was killed in a railroad wreck recently and wasn't that your wife who was hurt in an automobile accident?"
"Oh, yassuh, yassuh—but dat's deir hard luck—not mine."

SH-H-H!

An old colored woman in Alabama was on her sick bed and, fearing the worst, essayed to make preparations for her departure.
"Willyum," she said to her devoted sponse, "yo' gotter promise to bury me in de old place in Bummin'ham near mah mammy. Ise ain't gwine to rest in peace among all dese strange folkses heah."
"Dat'll be all right," assured Willyum, "we is gwine to try yo' heah fust, an' den, if yo' start raisin' a ruckus, we's gwine to try you' in Bummin'ham."

WHITE SUPREMACY.

They were a couple of ex-doughboys, but had been out of the army so long that they had forgotten the discomforts of hiking and fighting and freezing and starving and all the rest of it, and remembered only the good times and the free-for-all existence. Civilian life had become so monotonous that they decided something had to be done about it.
"Let's beat it for China," suggested one. "There's a good war goin' on and there ought to be some excitement, because they got three armies."
"No," objected the other. "Let's go to Ireland. They got one army there per capita."

WATER RESERVOIRS NEAR ELECTRA AND CHILDRESS.

The construction of a dam which will impound water enough from Beaver Creek to supply the town of Electra, the Waggoner refinery and Waggoner ranch, is being made under the supervision of R. L. Moore, manager of the Waggoner estate. The dam will be 200 feet thick at the base and 1,200 feet long and will stretch thirty-five feet high. It is to be constructed of concrete, steel and dirt. The lake is expected to be 1,200 to 3,000 feet wide, thirty feet deep and three miles long. Shortage of water in the Electra field has seriously hampered operations from time to time, but the new lake will contain water free from alkali, which will be ideal for boiler purposes.

Childress also is to build a large municipal reservoir, near that city, to impound water for domestic and commercial use. This municipal reservoir is reported to be the largest of its kind west of Fort Worth.

CITY EFFICIENCY STUDY.

Following the lead of Galveston, where nearly two years ago, a city efficiency study group was organized, Houston citizens have formed a study group to study city government, city development, city growth, city efficiency. In order that each member of a group may conduct a meeting an alphabetical rotation of chairmanship has been arranged.

The educational facilities of the United States include 573 colleges and universities.

LAND OF CITRUS FRUITS.

More than thirty thousand citrus fruit trees have been planted in Lower Rio Grande orchards during the last two and three years. More would have been planted, it is claimed, if more had been available. After the citrus fruit stock in Texas nurseries had been exhausted a call was sent to Florida and to California, but even the stocks from those states were exhausted before the demand had been satisfied.

As a means of protecting road signs on highways in the United States a request has been made to the executive council of the Boy Scouts of America to enlist the cooperation of Scouts in preserving the markers.

Whales do not belong to the fish family at all, but are related to seals. Both are supposed to have originated from bears.

MORE COTTON MILLS NEEDED.

J. D. Bagley, of A. & M. College, head of the department of engineering, insists that Texas should have more cotton mills. He points out eight essentials in the successful operation of a cotton mill. They are: Sufficient financial backing, adequate supply of labor, economical source of power, trained operating organization, capable executive management, raw cotton and markets. With all these factors easily obtainable in Texas—just as much in Texas as anywhere else in the country—there is no good reason why many cotton mills should not be established speedily throughout the state.

DEEP WATER AT POINT ISABEL.

It is an ambition and hope in the Lower Rio Grande valley to have a deep water port some time at Point Isabel, which is near the mouth of the Rio Grande. Government funds have been hard to obtain for the purpose, so the people of the valley are raising a "save our seaport" fund. The American Legion in Cameron and Hidalgo counties recently placed large cotton bags at each gin and above each a placard asking the farmers to contribute seed cotton for the deep water project. The response was liberal, is continuing so, and several bales of cotton have been accumulated and will be sold for the channel fund.

CARELESS MOTORISTS.

Of the 103 persons killed in railroad accidents in Texas during the year 1921 careless driving of motor cars was the cause of seventy-eight deaths upon railroad crossings, according to a report just issued by the Texas state railroad commission. All told, there were two hundred railroad accidents in Texas during the year and 136 of these were due to automobiles. In commenting on these statistics the railroad commission says:

"The reports disclose the fact that a great many of the distressing and pathetic accidents which have occurred at railroad crossings within the state during the past few years, and especially since the advent of motor-driven vehicles, are due to carelessness and inattention of the drivers of vehicles in general and motor cars in particular. In addition to crossing watchmen, many devices in the way of automatic electric bells, lights and gates have been installed at numerous crossings in the state to guard against and prevent accidents of this character, but none has proven entirely successful, and the conclusion has been gradually forced upon close students of this question that the only real solution of the problem lies in the education of the public to the fact that they must 'Stop, Look and Listen' before they attempt to cross a railroad track with a vehicle or otherwise if they expect to see material decrease in crossing accidents. 'This record speaks for itself: Number of accidents,

200; number of men, women and children killed, 103; number of men, women and children injured, 256. An average of one accident for 200 days out of a possible 365 days during the year, and an average of almost one person killed or injured for each and every day in the year. An increase of 13 per cent in the number killed and 4 per cent in the number injured over the previous year."

Stories for Boys and Girls

"Molly Fired Volley After Volley."

MOLLY PITCHER, HEROINE, REVOLUTIONARY WAR SERGEANT.

Molly Pitcher, whose real name was Mary Ludwig, was the daughter of a German settler in New Jersey. She was born on a small farm between Princeton and Trenton in 1754. Her father was a dairyman and Molly was always compelled to work very hard from early childhood.

When she was 16 years old and was serving as a maid in the home of Dr. Irvine, of Trenton, Molly was married to John Hays, an Irishman. When Hays answered the call to war Molly proudly gave up the little home they had made together, and went into the service of Dr. Irvine again, promising her husband that she would "stand by" him. Neither guessed that this would literally come true.

Later on Molly became so eager to share her husband's burdens that she rode off to his camp to mend and cook for the soldiers. She joined him at Monmouth court house and worked untiringly, aiding the wounded and mothering every soldier who came within the reach of the ministrations of her work-worn hands. They all grew to love her. One day, while Molly was carrying water to the wounded, some one called thirstily:

"Molly, pitcher!"

From this time on she was known as "Molly Pitcher."

One very hot June Sunday, Molly's great day came—the day upon which she had a chance to show the metal of which she was made.

Washington, after a hard winter at Valley Forge, had followed behind Clinton, who was marching across New Jersey from Philadelphia. The Americans waited for a chance to attack the British, whose army was 20 miles long. Cornwallis brought his men into line of action opposite Lee, who ordered a retreat. This angered Washington, who strove to rally the men. With the aid of Mad Anthony Wayne, Lafayette, Knox and Greene, Washington strove to save the day.

Molly's husband had an important position in the field artillery, and was loading and firing his cannon at the enemy.

Suddenly he pitched forward—dead. Heedless of her own life, Molly ran to the cannon, seized the rammer, reloaded the gun, and fired volley after volley.

General Knox, who was in charge of the battery, saw that she was as brave and competent as any man and permitted her to continue at her post.

The battle of Monmouth was won, and Molly was made a sergeant because of her bravery.

Molly remained with the army until the close of the war, and for years after lived at Carlisle barracks, cooking and washing for the soldiers. In 1822 the legislature of Pennsylvania voted her the sum of \$40 and annuity of that amount during her lifetime.

When she died ten years later, Molly was buried with military honors. On the Fourth of July, 1876, a monument was unveiled at Monmouth, inscribed: "To Molly Pitcher, the hero of Monmouth." Each year on the thirtieth of May, the grave of Molly Pitcher is decorated by the people of Carlisle.

MONTANA GRIZZLY KILLS OLD HUNTER.

Joseph Duret, pioneer hunter and trapper, a man who knew all the tricks of the game, was killed near Livingston, Montana, recently by a grizzly bear. Duret owned a nice ranch in the southern part of Park county, Montana, near the boundary of the Yellowstone National Park and he knew all the tricks of the hunting game, was well aware of the danger of encountering a vicious bear and yet he appears to have flirted with death in trying to kill alone a huge grizzly and to have lost.

Duret caught the animal in one of his game traps—a huge steel device that fastened itself with a clamp about the paw. He hastily returned home for his large bore rifle and told his wife of his catch. Mrs. Duret never saw him again. His failure to return prompted her to search the hills with dogs in vain. Then she appealed to the Yellowstone Park rangers.

They spread out over the country and after a long search W. Hutchings, assistant at the park buffalo corrals, and Ranger William Dehnhoff found Duret's mangled body nearly two miles from

where he had engaged in a life and death struggle with the beast. It was a wild, desolate place not ten miles from where Duret, in 1910, was introduced to and warmly greeted by President Roosevelt.

Pieces of hair and torn flesh, remnants of the broken trap and a clawed and chewed rifle told the story of the fight Duret made. Superintendent Horace M. Albright of Yellowstone Park, who investigated the old hunter's death, said the grizzly was a veteran brute of the park for which hunters had covered many a mile. It apparently had succeeded in breaking away from the trap after Duret fired a shot. It is believed the bear broke a chain which attached the trap to a tree, then attacked the hunter, whose rifle had apparently jammed.

It was apparent that Duret had tried to defend himself by using his rifle as a club, but his fight was useless. One arm and a leg were torn off and the body was mangled. It is believed he became unconscious, then revived after the bear had wearied of his prey and dragged away the chain attached to the trap. Signs indicated that Duret managed to crawl about two miles toward his home. The rangers say he must have retained full possession of his faculties, as he was making a straight line to his ranch when death overtook him.

The winds of highest velocity have been found about six or seven miles above the sea at the level of the highest clouds. Both above and below this level the speed falls off. At the altitude of six or seven miles the wind blows from the west at the rate of sixty to seventy-five miles per hour.

The most rapid river of any size in the world is the Rhone in France, the current of which ranges as high as forty miles an hour.

MINERAL RESOURCES OF TEXAS

(Continued from Page 5.)

changes occur in the presence of heat, pressure and moisture, and result in the formation of hydro-silicates of calcium and magnesium.

The sand used in the manufacture of sand-lime brick should be comparatively pure and preferably with some variation in the size of the grains. The mixture of lime, sand and water, is cut out in the form of bricks and conveyed to a hardening cylinder adapted for the purpose. The sand-lime brick are placed in this cylinder and subjected to a pressure and temperature which varies according to the method of treatment. With a pressure of about two atmospheres and a temperature of 125 degrees C, the duration of exposure in the cylinder should be about seventy-two hours. With a steam pressure of seven to ten atmospheres and 170 to 175 C, six to ten hours' exposure is usually sufficient. The sand-lime brick manufactured in Texas during 1920 was valued at \$113,533.

Concrete Building Blocks, Hollow Blocks or Artificial Stone.

The materials for the manufacture of concrete building blocks are sand, gravel, or crushed stone, and cement. The sand intended for use in making cement blocks should be sharp and angular. Coarse-grained sand is preferred to fine-grained. A mixture of coarse and fine-grained sand, however, gives excellent results, and requires less cement, since the relative proportion of voids in the sand is reduced by the presence of the fine grains of sand among the coarse.

Concrete building blocks have been used to some extent in the state. Where sand is abundant the ease of manufacturing, together with the relatively small cost of equipment, is favorable to this industry. The concrete building blocks made in the state in 1920 were valued at \$90,381.

Road Materials.

The road building materials of Texas include crushed stone of various kinds, marl, soft limestone, sand, gravel, sand-clay and asphalt impregnated limestone, as well as manufacturing materials, including cement and vitrified brick. The distribution of the materials used in road-making has already been described to some extent. Sand-clay is extensively used for country roads in Northeast Texas, where rock and gravel is wanting, or nearly so. Gravel beds are notably abundant and are much used for road building near the inner margin of the Coastal Plains and in the stream beds of the interior of the state. Rocks of various kinds suitable for road building is abundant, particularly in Central West and West Texas.

A valuable road material now much used and found in Uvalde and Kinney counties, consists of asphalt impregnated limestone. This limestone, found in the Anacacho formation, is a very porous rock made up chiefly of shell fragments. The asphalt has accumulated in the pores and cavities. When crushed and applied to roads the asphalt in the limestone forms a binder resulting in a road much superior to roads built of limestone alone.

EDITOR'S NOTE—This is the third of a series on "Mineral Resources of Texas." The fourth, on precious minerals, will be published in the November issue of our Magazine Section.

VOCATIONS FOR WAR VETERANS.

If there be any war veterans who desire vocational training they must file their applications with the United States Veterans' Bureau before December 16, and as much earlier as possible. This is not the final filing date, it is stated, but if efforts to rehabilitate the disabled soldiers is to be successful, permanent and gainful employment must be found for those who complete the strenuous and carefully worked out course of training prescribed by the new vocation into which the government is training them. The government already has spent nearly three hundred million dollars training some 110,000 veterans. Nearly four thousand veterans are now in training in the Fourteenth district, which includes Texas, Oklahoma and Arkansas. Some of them have been in training nearly two years. Numerous cases have come to light where rehabilitated men, through their technical training by the government, have been enabled to obtain employment which is paying them much more than they were able to earn by the pre-war occupations.

ARTIFICIAL LIMBS FOR EX-SERVICE MEN.

Hedgecock Artificial Limb & Brace Company of Dallas, Texas, recently received the official notice of the acceptance of their proposal to furnish artificial limbs and braces to the United States Veterans Bureau, District 14, which includes Texas, Oklahoma and Arkansas, for last half of the fiscal year 1922. This makes four consecutive years this company has been awarded a government contract. The first contract of 1918 was handled direct from Washington through the Bureau of War Risk Insurance, but in recent years it is officially accepted by the U. S. Veterans Bureau, Washington, D. C., and handled through the Headquarters Office of District 14, Dallas, Texas.

Artificial limbs have been of much help to our soldier boys who were crippled in the World's war. An artificial limb enables the man who has lost a foot or a leg to get about more lively and improves his opportunity in seeking employment.

REWARDS FOR GOOD SERVICE.

Gold and silver medals, representing first and second awards, are to be given, according to the terms of an ordinance now under consideration to Dallas firemen and policemen who perform acts of special bravery or merit during the year. Mayor Aldredge thinks too little attention has been given to acts of special bravery and heroism by policemen and firemen of this city, and that awards of gold and silver medals will bring greater respect from the citizens for the officers and improve the morale of both departments.

FIGHTING THE PRAIRIE DOGS.

Fighting the prairie dogs has come to be more than a pastime in Sherman, Hartley and Moore counties of West Texas, where the ranchmen and farmers have organized their forces with the determination to exterminate the prairie dogs or have a good excuse for failure. They have ordered six tons of poisoned grain as a starter, and expect to place another large order before they accomplish their purpose. The prairie dogs have become such a terrible nuisance in portions of West Texas that the ranchmen-farmers have decided to get rid of them at any cost.
